| 1. Record Nr. | UNINA9910829168903321 |
| Titolo | Immunopotential |
| Pubbl/distr/stampa | Amsterdam, : Elsevier, 1973 |
| ISBN | 9786613693754 9781280783364 1280783362 9780470720011 0470720018 9780470717684 0470717688 |
| Edizione | [1st ed.] |
| Descrizione fisica | 1 online resource (368 pages) |
| Collana | Ciba Foundation symposium (new series) ; ; 18 |
| Disciplina | 574.2/9 |
| Soggetti | Immunological adjuvants Tumors - Immunological aspects |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Note generali | "Symposium on Immunopotential, held at the Ciba Foundation, London, 18th-19th January 1973"--Participants page. |
| Nota di bibliografia | Includes bibliographical references and indexes. |
| Nota di contenuto | Immunopotential; Contents; Introduction; The cellular targets for the action of adjuvants : T-adjuvants and B-adjuvants; Discussion; The relation of lymphocyte trapping to the mode of action of adjuvants; Discussion; Immunopotential by mycobacteria in complete Freund-type adjuvant as the failure of normal immunological homeostasis; Discussion; Effects of adjuvants on different cell types and their interactions in immune responses; Discussion; Cellular mechanisms underlying the adjuvant activity of <i>Corynebacterium parvum</i> : interactions of activated macrophages with T and B lymphocytes DiscussionChemotaxis of macrophages : the role of a macrophage-specific cytotoxin from anaerobic corynebacteria and its relation to immunopotential in vivo; Discussion; The allogeneic effect on the immune system and its potential applications to tumour immunity; Discussion; Mitogens as probes for immunocyte activation : specific and non-specific paralysis of B cell mitogenesis; Discussion; General Discussion I The T cell-deprived mouse; The use of viruses as |

immunological potentiators; Discussion

Corynebacterium parvum, a potent immunostimulant in experimental infections and in malignancies Discussion; Orchidectomy as a method of immunopotential in mice; Discussion; The nature of immunopotential by the anti-tumour polysaccharide lentinan and the significance of biogenic amines in its action; Discussion; The effect of Corynebacterium parvum and other reticuloendothelial stimulants on transplanted tumours in mice; Discussion; Attempt at using systemic immunity adjuvants in experimental and human cancer therapy; Discussion

General Discussion II Restoration of immune capability in cancer patients Sites of action of adjuvants; Conclusion; Index of contributors; Subject index

Sommario/riassunto

The Novartis Foundation Series is a popular collection of the proceedings from Novartis Foundation Symposia, in which groups of leading scientists from a range of topics across biology, chemistry and medicine assembled to present papers and discuss results. The Novartis Foundation, originally known as the Ciba Foundation, is well known to scientists and clinicians around the world.
