Sommario/riassunto

Ideas on how to reform the financial services industry, from experts on the inside In the wake of the financial crisis of 2008 the practices of the entire global financial services industry have been called into question. From the government, to the media, to the general public, everyone is re-thinking the way forward for the financial sector, but the stakes are high. Should negative trends in the industry continue and financial innovations allow fallout from the next crisis to grow exponentially, the endgame could be the sort of mutually assured destruction that topples entire econom
