

1. Record Nr.	UNINA9910829996303321
Titolo	Autonomous road vehicle path planning and tracking control // Levent Guvenc [and three others]
Pubbl/distr/stampa	Hoboken, New Jersey : , : John Wiley & Sons, Inc., , [2022] ©2022
ISBN	1-119-74796-1 1-119-74797-X 1-119-74795-3
Descrizione fisica	1 online resource (259 pages)
Collana	IEEE Press Series on Control Systems Theory and Applications
Disciplina	629.04/6
Soggetti	Automated vehicles - Design and construction Automated vehicles - Collision avoidance systems Mathematical optimization - Industrial applications
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Cover -- Title Page -- Copyright -- Contents -- About the Authors -- Preface -- List of Abbreviations -- Chapter 1 Introduction -- 1.1 Motivation and Introduction -- 1.2 History of Automated Driving -- 1.3 ADAS to Autonomous Driving -- 1.4 Autonomous Driving Architectures -- 1.5 Cybersecurity Considerations -- 1.6 Organization and Scope of the Book -- 1.7 Chapter Summary and Concluding Remarks -- References -- Chapter 2 Vehicle, Path, and Path Tracking Models -- 2.1 Tire Force Model -- 2.1.1 Introduction -- 2.1.2 Tire Forces/Moments and Slip -- 2.1.3 Longitudinal Tire Force Modeling -- 2.1.4 Lateral Tire Force Modeling -- 2.1.5 Selfaligning Moment Model -- 2.1.6 Coupling of Tire Forces -- 2.2 Vehicle Longitudinal Dynamics Model -- 2.3 Vehicle Lateral Dynamics Model -- 2.3.1 Geometry of Cornering -- 2.3.2 SingleTrack Lateral Vehicle Model -- 2.3.3 Augmented Single Track Lateral Vehicle Model -- 2.3.4 Linearized Single Track Lateral Vehicle Model -- 2.4 Path Model -- 2.5 Pure Pursuit: GeometryBased LowSpeed Path Tracking -- 2.6 Stanley Method for Path Tracking -- 2.7 Path Tracking in Reverse Driving and Parking -- 2.8 Chapter Summary and Concluding Remarks -- References -- Chapter 3

Simulation, Experimentation, and Estimation Overview -- 3.1
Introduction to the SimulationBased Development and Evaluation
Process -- 3.2 ModelintheLoop Simulation -- 3.2.1 Linear and
Nonlinear Vehicle Simulation Models -- 3.2.2 Higher Fidelity Vehicle
Simulation Models -- 3.3 Virtual Environments Used in Simulation --
3.3.1 Road Network Creation -- 3.3.2 Driving Environment
Construction -- 3.3.3 Capabilities -- 3.4 HardwareintheLoop
Simulation -- 3.5 Experimental Vehicle Testbeds -- 3.5.1 Unified
Approach -- 3.5.2 Unified AV Functions and Sensors Library -- 3.6
Estimation -- 3.6.1 Estimation of the Effective Tire Radius.
3.6.2 Slip Slope Method for Road Friction Coefficient Estimation --
3.6.3 Results and Discussion -- 3.7 Chapter Summary and Concluding
Remarks -- References -- Chapter 4 Path Description and Generation
-- 4.1 Introduction -- 4.2 Discrete Waypoint Representation -- 4.3
Parametric Path Description -- 4.3.1 Clothoids -- 4.3.2 Bezier Curves
-- 4.3.3 Polynomial Spline Description -- 4.4 Tracking Error
Calculation -- 4.4.1 Tracking Error Computation for a Discrete
Waypoint Path Representation -- 4.4.2 Tracking Error Computation for
a Spline Path Representation -- 4.5 Chapter Summary and Concluding
Remarks -- References -- Chapter 5 Collision Free Path Planning -- 5.1
Introduction -- 5.2 Elastic Band Method -- 5.2.1 Path Structure --
5.2.2 Calculation of Forces -- 5.2.3 Reaching Equilibrium Point -- 5.2.4
Selected Scenarios -- 5.2.5 Results -- 5.3 Path Planning with Minimum
Curvature Variation -- 5.3.1 Optimization Based on G2Quintic Splines
Path Description -- 5.3.2 Reduction of Computation Cost Using Lookup
Tables -- 5.3.3 GeometryBased CollisionFree Target Points Generation
-- 5.3.4 Simulation Results -- 5.4 ModelBased Trajectory Planning --
5.4.1 Problem Formulation -- 5.4.2 Parameterized Vehicle Control --
5.4.3 Constrained Optimization on Curvature Control -- 5.4.4
Sampling of the Longitudinal Movements -- 5.4.5 Trajectory Evaluation
and Selection -- 5.4.6 Integration of Road Friction Coefficient
Estimation for Safety Enhancement -- 5.4.7 Simulation Results in
Complex Scenarios -- 5.5 Chapter Summary and Concluding Remarks
-- References -- Chapter 6 PathTracking Model Regulation -- 6.1
Introduction -- 6.2 DOB Design and Frequency Response Analysis --
6.2.1 DOB Derivation and Loop Structure -- 6.2.2 Application Examples
-- 6.2.3 Disturbance Rejection Comparison -- 6.3 Q Filter Design --
6.4 Time Delay Performance.
6.5 Chapter Summary and Concluding Remarks -- References --
Chapter 7 Robust Path Tracking Control -- 7.1 Introduction -- 7.2
Model Predictive Control for Path Following -- 7.2.1 Formulation of
Linear Adaptive MPC Problem -- 7.2.2 Estimation of Lateral Velocity --
7.2.3 Experimental Results -- 7.3 Design Methodology for Robust Gain
Scheduling Law -- 7.3.1 Problem Formulation -- 7.3.2 Design via
Optimization in Linear Matrix Inequalities Form -- 7.3.3 Parameter
Space GainScheduling Methodology -- 7.4 Robust GainScheduling
Application to PathTracking Control -- 7.4.1 Car Steering Model and
Parameter Uncertainty -- 7.4.2 Controller Structure and Design
Parameters -- 7.4.3 Application of ParameterSpace GainScheduling --
7.4.4 Comparative Study of LMI Design -- 7.4.5 Experimental Results
and Discussions -- 7.5 Addon Vehicle Stability Control for
Autonomous Driving -- 7.5.1 Direct Yaw Moment Control Strategies --
7.5.2 Direct Yaw Moment Distribution via Differential Braking -- 7.5.3
Simulation Results and Discussion -- 7.6 Chapter Summary and
Concluding Remarks -- References -- Chapter 8 Summary and
Conclusions -- 8.1 Summary -- 8.2 Conclusions -- Index -- Books in
the IEEE Press Series on Control Systems Theoryand Applications --
EULA.

Sommario/riassunto

Comprehensive explorations of vehicle, path, and path tracking models, model-in-the-loop simulation models, and hardware-in-the-loop models. In-depth examinations of collision free path planning and collision avoidance. Perfect for advanced undergraduate and graduate students with an interest in autonomous vehicles, Autonomous Road Vehicle Path Planning and Tracking Control is also an indispensable reference for practicing engineers working in autonomous driving technologies and the mobility groups and sections of automotive OEMs"--
