

1. Record Nr.	UNINA9910830018003321
Autore	Katsagoni Christina N.
Titolo	Prevention and management of cardiovascular and metabolic disease : physical activity, fitness and healthy aging // Christina N. Katsagoni, Peter Kokkinos, and Labros S. Sidossis
Pubbl/distr/stampa	Chichester, England : , : John Wiley & Sons Ltd, , [2023] ©2023
ISBN	1-119-83347-7 1-119-83345-0
Descrizione fisica	1 online resource (413 pages)
Disciplina	613.71
Soggetti	Exercise Metabolic disorders in children
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Cover -- Title Page -- Copyright Page -- Contents -- Preface -- List of Contributors -- UNIT 1 Diet and Physical Activity as Determinants of Human Health -- CHAPTER 1 The Link between Sub-optimal Diet and Physical Inactivity with Non-communicable Diseases -- Introduction -- Sub-optimal Diet in Terms of Nutrients -- Low Dietary Fiber Intake -- High Dietary Sodium Intake -- High Saturated Fatty Acid Intake -- High Trans Fatty Acids Intake -- Sub-optimal Diet in Terms of Foods and Food Groups -- Low Consumption of Fruits and Vegetables -- Low Consumption of Whole-grain Products -- High Intake of Added/Free Sugar and Sweetened Beverages -- Foods and Food Groups Rich in Saturated Fatty Acids -- High Processed-meat Consumption -- Sub-optimal Diet in Terms of Dietary Patterns -- The Western Dietary Pattern -- Physical Inactivity -- Key Points -- Self-assessment Questions -- References -- Further Reading -- Bibliography -- Links -- CHAPTER 2 Lifestyle and Epigenetics -- Introduction -- Epigenetics Overview -- Epigenetics Definition -- Epigenetic Mechanisms -- Epigenetics and Disease Epidemiology -- The Barker Hypothesis -- Epigenetics in utero and Maternal Lifestyle -- Maternal Undernutrition -- Maternal Overnutrition -- Dietary Pattern as an Epigenetic Mark -- Epigenetics and Stress -- Psychological Stress -- Cigarette Smoking --

Alcohol Consumption -- Endocrine Disruptors -- Physical Activity and Epigenetic Alterations -- Key Points -- Self-assessment Questions -- References -- Further Reading -- Bibliography -- CHAPTER 3 Healthy/Prudent Diets and Health Benefits in Adults -- Introduction -- A Healthy/Prudent Diet Definition -- Dietary Patterns that are Considered Healthy -- The Mediterranean-type Dietary Pattern -- Health Effects of the Mediterranean Diet -- All-cause and Disease-specific Mortality -- Cardiovascular Diseases -- Hypertension. Type 2 Diabetes Mellitus -- Dyslipidemia -- Obesity/Metabolic syndrome -- Cancer -- Healthy Aging -- The Dietary Approaches to Stop Hypertension (DASH) Dietary Pattern -- Initial Dietary Approaches to Stop Hypertension (DASH) Trials -- The Dietary Approaches to Stop Hypertension (DASH) Diet Characteristics -- The Dietary Approaches to Stop Hypertension (DASH) Diet Health Effects -- Obesity/Metabolic Syndrome -- Type 2 Diabetes Mellitus/Hyperglycemia -- Hyperlipidemia -- Cancer -- Chronic Kidney Disease -- The Healthy Nordic Dietary Pattern -- Health Effects of the Nordic Diet -- Chronic Disease Risk -- All-cause and Specific-cause Mortality -- Inflammation -- Physical Performance and Cognitive Health in Older Adults -- The Healthy Vegetarian-type Dietary Pattern -- Health Effects of the Healthy Vegetarian-type Dietary Pattern -- CVD Risk and Mortality -- Blood Pressure/Hypertension -- Type 2 Diabetes -- Metabolic Syndrome -- Cancer -- Considerations in Implementing a Healthy Vegetarian-type Dietary Pattern -- The Healthy US-style Dietary Pattern -- Effectiveness of Healthy/Prudent Dietary Patterns -- Key Points -- Self-assessment Questions -- References -- Further Reading -- Bibliography -- Links -- UNIT 2 Basic Concepts of Physical Activity and Fitness -- CHAPTER 4 Definition of Fitness and Its Components -- Definition of Physical Fitness -- Aerobic and Anaerobic Fitness -- Health-related Physical Fitness Components -- Cardiovascular or Cardiorespiratory Fitness -- Body Composition -- Muscular Fitness -- Muscular Strength -- Muscular Endurance -- Muscular Endurance Versus Aerobic Endurance -- Flexibility -- Skill-Related Physical Fitness Components -- Speed, Agility, Balance, Reaction Time, Power -- Key Points -- Self-assessment Questions -- References -- Further Reading -- Bibliography -- Links -- CHAPTER 5 Defining Physical Activity and Exercise. Definition of Physical Activity and Exercise -- Quantifying the Intensity of Physical Activity -- Total Energy Expenditure -- Physical Activity Level -- Perceived Exertion (Borg Rating of Perceived Exertion Scale) -- Metabolic Equivalents of Task -- VO₂max -- Percent of Maximum Heart Rate -- Heart Rate Reserve Method (Karvonen Method) -- VO₂ Reserve Method -- Exercise Duration -- Exercise Frequency -- Exercise Volume -- Key Points -- Self-assessment Questions -- References -- Further Reading -- Bibliography -- Links -- CHAPTER 6 Implications and Health Benefits of Physical Activity in Adults -- Introduction -- Physical Activity and Inactivity Estimations Worldwide -- Sedentary Behavior -- Premature All-cause Mortality -- Health Impact of Physical Activity -- Physical Activity Guidelines -- Interventions to Increase Physical Activity -- Key Points -- Self-assessment Questions -- References -- Further Reading -- Bibliography -- Links -- UNIT 3 Determinants of Healthy Aging -- CHAPTER 7 Healthy Aging: Definition and Scope -- Introduction -- Overview of the Aging Process -- Biology of Aging -- Early Concepts of Healthy Aging -- The Concept of Successful Aging -- Healthy Aging -- Definition -- Life-course Approach to Healthy Aging -- Special Considerations -- Key Points -- Self-assessment Questions -- References -- Further Reading -- Bibliography -- CHAPTER 8 The Interface Between Healthy Aging, Longevity, and Disease -- Introduction -- Overview of Longevity -- The

Longevity Boom -- Sex Differences -- Geographical Longevity Clusters -- Overview of the Concepts of Morbidity and Mortality -- Longevity as a Healthy Aging Model -- Are the Long Lived, Healthy Lived? -- The Heritability of Longevity and Healthy Aging -- Epigenetic Mechanisms and Longevity -- How to Achieve a Healthy and Long Life Span -- Key Points -- Self-assessment Questions -- References.

Further Reading -- Bibliography -- Links -- CHAPTER 9 Physiological Changes in Multiple Organ Systems Through Aging: Measuring and Monitoring Aging -- Introduction -- Physiological Changes in Multiple Organ Systems Through Aging -- Cardiovascular -- Pulmonary -- Immune System -- Neurologic Function -- Musculoskeletal System -- Sarcopenia -- Frailty -- Measurements -- Hand-grip Strength -- Gait Speed -- Balance Assessment -- Timed Up-and-Go (TUG) Test -- 30-second Chair Stand -- Four-stage Balance Test -- Complex Balance Measures -- Short Physical Performance Battery (SPPB) -- Functionality Assessment Tools: Activities of Daily Living (ADLs) Assessment Tools -- ADL Assessment Tool: Barthel Index -- ADL Assessment Tool: Katz Index of Independence in Activities of Daily Living (ADL) -- ADL Assessment Tool: Functional Independence Measure (FIM) -- IADL Assessment Tool: ADL Profile Instrumental (IADL) -- IADL Assessment Tool: Lawton Instrumental ADL Scale -- IADL Assessment Tool: Performance Assessment of Self-care Skills (PASS) -- Key Points -- Self-assessment Questions -- References -- Further Reading -- Bibliography -- Links -- CHAPTER 10 The Role of Plant-based Diets on Healthy Aging -- Introduction -- The Role of Macronutrients in Healthy Aging -- Protein -- Carbohydrates -- Fat Intake -- Plant-based Diets -- Plant Polyphenols -- The Mediterranean Diet -- The Nordic Diet -- Dietary Approaches to Stop Hypertension (DASH) Diet -- The Okinawan Diet -- Key Points -- Self-assessment Questions -- References -- Further Reading -- Bibliography -- Links -- CHAPTER 11 Physical Activity as a Determinant of Healthy Aging -- Introduction -- Physical Inactivity -- Physical Activity as a Determinant of Healthy Aging -- Cardiovascular Health -- Immune System -- Cognitive Function -- Musculoskeletal Health -- Physical Activity and Sarcopenia. Physical Activity and Frailty -- The VIVIFRAIL Exercise Protocol -- Physical Activity Recommendations for Older Adults -- Key Points -- Self-assessment Questions -- References -- Further Reading -- Bibliography -- UNIT 4 Cardiovascular Health, Diet, and Physical Activity -- CHAPTER 12 Heart Failure -- Introduction -- Definition -- Classification -- Prevalence -- Clinical Conditions Associated with Heart Failure -- Obesity -- Obesity Paradox -- Malnutrition and Sarcopenia Heart Failure Patients -- Diabetes and Heart Failure -- Heart Failure in Older Adults -- Cognitive Impairment in Patients with Heart Failure -- Therapeutic Management of Heart Failure -- Lifestyle Factors and Heart Failure -- Body Weight and Caloric Restriction -- Nutrition and Dietary Approaches -- Sodium Restriction -- Fluid Restriction -- Dietary Patterns -- DASH Diet -- Mediterranean Diet -- Nutritional Supplements -- Thiamine Supplementation -- Iron Supplementation -- Essential Amino Acids Supplementation -- Omega-3 Poly-unsaturated Fatty Acid Supplementation -- Physical Activity and Exercise for Heart Failure Prevention and Therapy -- Physical Activity and Heart Failure -- Physical Inactivity and Heart Failure -- Exercise Training in Heart Failure -- Intensity of Exercise in Patients with Heart Failure -- Type of Exercise in Patients with Heart Failure -- Tailored Exercise Advice in Patients with Heart Failure -- Key Points -- Self-assessment Questions -- Case Scenario -- References -- Further Reading -- Bibliography -- Links -- CHAPTER 13 Atrial/Flutter Fibrillation -- Definition -- Prevalence -- Etiology -- Complications -- Management -- Nutrition in

Atrial Fibrillation -- Physical Activity and Risk of Atrial Fibrillation --
Exercise Training and Atrial Fibrillation Management -- Physical Activity
Recommendations -- Key Points -- Self-assessment Questions --
References.
Further Reading.
