Titolo Recognition and perception of images : fundamentals and applications

// edited by Iftikhar B. Abbasov

Pubbl/distr/stampa Hoboken, New Jersey;; Beverly, Massachusetts:,: Scrivener Publishing

:,: Wiley,, [2021]

2021

ISBN 1-119-75199-3

1-119-75197-7

Descrizione fisica 1 online resource (xvi, 448 pages) : illustrations

Disciplina 006.37

Soggetti Computer vision

Lingua di pubblicazione Inglese

Formato Materiale a stampa

Livello bibliografico Monografia

Sommario/riassunto

"This book is dedicated to the unique interdisciplinary research of imagery processing, recognition and perception. The contents of this book are based on the concepts of mathematical processing, compositional analysis applied in the art and design, and psychological factors of the information perception process. The conduction of compositional analysis carried out in the course of images processing and recognition, creation of the image project solution and modeling of the conceptual space structures are considered together with the mechanism of their perception. Edited and written by a group of international experts, the practical applications for industry are covered, including the influence of internet memes on social networks and face recognition technology subject to interferences. The algorithms of perception and improving of accuracy necessary for satellite imagery recognition and complex reflection from the object are represented with the use of artificial neural networks. Not just a study in how humans recognize and perceive images, this outstanding new volume delves into how these processes are used in technology for continuously evolving industrial applications. Whether for the veteran scientist or engineer, or for the student, this is a must-have for any library"--
