|-------------------------|--|
| 1. Record Nr.           | UNINA9910830045203321  |
| Titolo                  | Ciba Foundation Symposium [[electronic resource] ] : control of glycogen metabolism // consulting editor, W.J. Whelan ; editor for the Ciba Foundation, Margaret P. Cameron  |
| Pubbl/distr/stampa      | Boston, : Little, Brown, 1964  |
| ISBN                    | 1-280-76871-1<br>9786613679482<br>0-470-71934-6<br>0-470-71688-6   |
| Descrizione fisica      | 1 online resource (455 p.)   |
| Collana                 | Ciba Foundation symposium  |
| Altri autori (Persone)  | WhelanW. J (William Joseph)<br>CameronMargaret P   |
| Disciplina              | 574.13   |
| Soggetti                | Glycogen - Metabolism  |
| Lingua di pubblicazione | Inglese  |
| Formato                 | Materiale a stampa   |
| Livello bibliografico   | Monografia   |
| Note generali           | Description based upon print version of record.  |
| Nota di bibliografia    | Includes bibliographical references and indexes.   |
| Nota di contenuto       | CONTROL OF GLYCOGEN METABOLISM; Preface; Contents; Chairman's opening remarks; Basic Processes of Glycogen Metabolism; Structure of glycogen and its amyolytic degradation; Discussion; Physical characteristics of undegraded glycogen; Discussion; Intestinal hydrolysis and absorption of glycogen-derived oligosaccharides; Discussion; Role of uridine diphosphate glucose in the synthesis of glycogen; Discussion; Branching enzyme; Discussion; The structure of phosphorylases; Discussion; The influence of phosphorylase on the structure of glycogen; Discussion<br>The enzymic debranching of glycogen and the role of transferaseThe role of oligo-1,4 ->1,4-glucontransferase and amylo-1,6-glucosidase in the debranching of glycogen; The mechanism of action of amylo-1,6-glucosidase; Discussion; Animal tissue y-amylase and its role in the metabolism of glycogen; Discussion; General discussion; Basic processes of glycogen metabolism; Control of Glycogen Metabolism; Interconversion reactions of muscle phosphorylases b and a; Regulation of glycolysis in skeletal muscle; Discussion<br>The cellular locatipn of adenyl cyclase and adenosine-3,5'-phosphate |

in Escherichia coli Discussion; Biochemical effects of adrenaline on intestinal smooth muscle; Discussion; Regulation of glycogenolysis in muscle; Discussion; Insulin and the control of UDPG -glucan transglucosylase activity; Discussion; Possible indirect effects of adrenaline on glycogen metabolism; Discussion; Hexokinase and glucokinase; Discussion; Glycogen Storage Diseases; Clinical manifestations of glycogen storage diseases; Discussion; Glycogen storage disease, Type I; Discussion  
Glycogen storage diseases, Types III, IV, and VI Discussion; Glycogen storage disease, Type II; Discussion; Glycogen storage disease, Type V; Discussion; Glycogen synthetase deficiency; Discussion; Studies of storage disease glycogens; Discussion; General Discussions; Glycogen storage diseases; Diagram of glycogen synthesis and degradation; Enzyme nomenclature; Author index; Subject index
