

1. Record Nr.	UNINA9910830065203321
Titolo	Proceedings of the 17th Annual Conference on Composites and Advanced Ceramic Materials [[electronic resource] ] . part 1 : January 10-15, 1993, Cocoa Beach, FL // David C. Cranmer, program chair
Pubbl/distr/stampa	Westerville, OH, : American Ceramic Society, c1993
ISBN	9786612313837 1-282-31383-5 0-470-31621-7 0-470-31418-4
Descrizione fisica	1 online resource (704 p.)
Collana	Ceramic engineering and science proceedings, , 0196-6219 ; ; 14/7-8
Altri autori (Persone)	CranmerDavid C
Disciplina	738
Soggetti	Composite materials Ceramic materials
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Table of Contents; The James I. Mueller Memorial Lecture; Microwave Processing: Present Status and Future Promise; Industrial Perspectives on Advanced Ceramics; Current U.S. Markets for Advanced Ceramics and Projections for Future Growth; Promising State-of-the-Art Technologies in Advanced Ceramics; Critical Issues in Technology Transfer; A Government Perspective on the Advanced Materials and Processing Program(AMPP); Testing Methodology and Standards; An Analytical Framework for Assessing the Enabling Opportunity of Advanced Materials Fractography and Characterization of Fracture Origins in Advanced Structural CeramicsAn Axial/Torsional Test Method for Ceramic Matrix Composite Tubular Specimens; Fracture Toughness of Advanced Ceramics at Room Temperature: A VAMAS Round Robin; Fracture Toughness (K <sub>Ic</sub> and y <sub>wor</sub> ) of a HIPed Si <sub>3</sub> N <sub>4</sub> , at Elevated Temperatures; Creep Behavior of Flexure Beam Specimens of Sic Whisker-Reinforced Composite and Monolithic Silicon Nitrides; High-Temperature Compression Test Apparatus for Fiber-Reinforced Ceramic Composites Measurement of Interfacial Micromechanics in Fiber-Reinforced

Ceramic Matrix Composites Interfacial Frictional Shear Stresses in Ceramic Matrix Composites; A Comparison of Single- and Multi-Fiber Pushout Techniques; Development of an Interfacial Test System for the Determination of Interfacial Properties in Fiber-Reinforced Ceramic Composites; Evaluation of the Interfacial Mechanical Properties in Fiber-Reinforced Ceramic Composites; Evaluation of Thermal Residual Stresses in SiC/MLAS and SiC/SiC Composites by the Microindentation Push-Down Test

Evaluation of the Elastic and Plastic Properties of Si<sub>3</sub>N<sub>4</sub> by Depth-Sensing Indentation Shear Test and Shear Strength of Ceramic Composites; Fiber Twist Test Apparatus To Measure Composite Interface Properties; Method for Obtaining Thermal Expansion Values for Low-Expansion Fibers Using a DuPont TMA; Loading Effect on Interfacial Properties of Fiber-Reinforced Borosilicate Glass Composites; High-Temperature Interfacial Shear Strength Testing of Ceramic Matrix Composites; Fatigue Crack Growth in Advanced Ceramic Materials; Design, Lifetime, and Reliability of Composites; Rough Fiber Pullout in Brittle Matrix Composites: Experiments and Simulations; Interfacial Sliding Stress Transfer Mechanism of Fiber-Reinforced Ceramic Matrix Composites; Fatigue and Fracture of an SiC/CAS Continuous-Fiber-Reinforced Glass-Ceramic Matrix Composite at Ambient and Elevated Temperatures; Fracture Process Zone in SiCw/Al<sub>2</sub>O<sub>3</sub>; Room Temperature Tensile Strength of AlN; Thermomechanical Fatigue of Nicalon KAS Under In-Phase and Out-of-Phase Cyclic Loadings; Life Prediction Methodologies and Data for Ceramic Materials in Advanced Application-A Basis for Standards; Silicon Nitride Tensile Strength Database from CTP Processing for Reliability Project

---

#### Sommario/riassunto

This volume is part of the Ceramic Engineering and Science Proceedings (CESP) series. This series contains a collection of papers dealing with issues in both traditional ceramics (i.e., glass, whitewares, refractories, and porcelain enamel) and advanced ceramics. Topics covered in the area of advanced ceramic include bioceramics, nanomaterials, composites, solid oxide fuel cells, mechanical properties and structural design, advanced ceramic coatings, ceramic armor, porous ceramics, and more.
