22 Managing the exploitation of brook trout, *Salvelinus fontinalis* (Mitchill), populations in Newfoundland lakes23 Factors affecting the

performance of stillwater coarse fisheries in England and Wales; 24

Management of fisheries in a large lake - for fish and fishermen; 25

Fishery management practices in French lakes; 26 Fisheries and

fisheries management on Lake Peipsi-Pihkva; 27 Role of non-exploited fishery resources in Sri Lankan reservoirs as a source of food for cage

aquaculture; 28 Potential species for fishery enhancement in Lake Fae, Cote d'Ivoire

29 Pelagic cichlid fishes of Lake Malawi/Nyasa: biology, management and conservation

Sommario/riassunto

In this comprehensive edited book, international experts in fisheries management and ecology review and appraise the status of lake and reservoir fisheries, assessment of fisheries yields, trophic ecology, rehabilitation and conservation, including a special section on African lakes where so much information of huge relevance to fisheries managers is now available. Contributions from around the world. Carefully edited by internationally respected editor. Has been generated from acclaimed HIFI Symposium.
