

1. Record Nr.	UNINA9910830115503321
Autore	Knudsen Steen
Titolo	A biologist's guide to analysis of DNA microarray data [[electronic resource] /] / Steen Knudsen
Pubbl/distr/stampa	New York, : Wiley-Interscience, c2002
ISBN	1-280-55646-3 9786610556465 0-471-46118-0 0-471-22758-7
Descrizione fisica	1 online resource (148 p.)
Disciplina	572.8/636 572.8636
Soggetti	DNA microarrays
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. 104-122) and index.

Sommario/riassunto

A great introductory book that details reliable approaches to problems met in standard microarray data analyses. It provides examples of established approaches such as cluster analysis, function prediction, and principle component analysis. Discover real examples to illustrate the key concepts of data analysis. Written for those without any advanced background in math, statistics, or computer sciences, this book is essential for anyone interested in harnessing the immense potential of microarrays in biology and medicine.
