

1. Record Nr.	UNINA9910830129503321
Autore	Aouad Ghassan
Titolo	Requirements engineering for computer integrated environments in construction [[electronic resource] /] / Ghassan Aouad & Yusuf Arayici
Pubbl/distr/stampa	Chichester, West Sussex, U.K. ; ; Ames, IA, : Blackwell Pub., 2010
ISBN	1-283-20478-9 9786613204783 1-4443-1774-1 1-4443-1775-X
Descrizione fisica	1 online resource (258 p.)
Altri autori (Persone)	ArayiciYusuf
Disciplina	690.0285
Soggetti	Communication in the building trades Building - Superintendence - Data processing Requirements engineering
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Requirements Engineering for Computer Integrated Environments in Construction; Contents; Foreword; Preface; Acknowledgments; Abbreviations; Chapter 1 Introduction; 1.1 Definitions; 1.1.1 Computer integrated environments; 1.1.2 Requirements engineering; 1.2 Why Requirements Engineering Is Needed for the CIE Development; 1.3 How the Requirements Engineering Approach Is Formulated; Chapter 2 Requirements Engineering in Software Development; 2.1 Introduction; 2.2 Requirements Engineering; 2.3 Requirements Fundamentals and Principles; 2.3.1 Purposefulness; 2.3.2 Appropriateness; 2.3.3 Truthfulness 2.4 Requirements Engineering Process2.4.1 Contextual design approach; 2.4.2 Use case-driven requirements analysis; 2.4.3 Agile requirements engineering processes; Chapter 3 Computer Integrated Environments; 3.1 Introduction; 3.2 The Construction Industry and its Features; 3.2.1 Benefits of CIE to the construction industry; 3.3 The Scope and Roles of CIE in Construction; 3.3.1 Building information modelling (BIM); 3.3.2 Product models; 3.4 Implementation of CIE in the Construction Industry; 3.5 The CIE Case Study Project 1; 3.5.1 The CIE

system in Case Study 1; 3.6 The CIE Case Study Project 2  
3.6.1 The CIE system in Case Study 23.7 The CIE Case Study 3; 3.7.1  
The CIE system in Case Study 3; 3.8 The CIE Case Study 4; 3.8.1 The  
CIE system in Case Study 4; Chapter 4 Requirements Engineering in CIE  
Development for the Construction Industry; 4.1 Introduction; 4.2 CIE  
Systems from Technological Perspective; 4.3 Requirements Engineering  
in the CIE Community; 4.3.1 The ATLAS system; 4.3.2 The OSCON  
system; 4.3.3 The SPACE system; 4.3.4 The WISPER system; 4.3.5 The  
GALLICON system; 4.3.6 The DIVERCITY system; 4.3.7 The nD  
modelling system; 4.4 Interviews in the Construction CIE Community  
4.4.1 Importance of requirements engineering in computer integrated  
construction (CIC) development4.4.2 Influence of requirements  
engineering upon implementation; 4.4.3 Lack of requirements  
engineering in the CIE developments; 4.4.4 Increasing awareness about  
requirements engineering in the CIE community; 4.4.5 Main criteria for  
requirements engineering activities; 4.4.6 Evaluation of the  
requirements engineering approaches; Chapter 5 Evaluation of  
Requirements Engineering Processes; 5.1 Introduction; 5.2 Improving  
the Requirements Engineering Process  
5.2.1 Traceability through product and process modelling5.2.2 Goal-  
oriented requirements engineering; 5.2.3 Essential and incidental  
complexity in requirements models; 5.2.4 The measurability of quality  
requirements; 5.2.5 The requirement fundamentals; 5.2.6 Identifying  
and involving the stakeholders; 5.2.7 Reconciling software  
requirements and architectures; 5.2.8 Barriers to uptake of  
requirements engineering; 5.3 Measuring the Success of Requirements  
Engineering Process; 5.4 Comparative Analysis and Evaluation; Chapter  
6 Requirements Engineering Approach in the Case Projects  
6.1 Introduction

---

## Sommario/riassunto

Efficient communication, collaboration, data exchange and sharing are crucial for the success of today's many multi-disciplinary and interdisciplinary work environments. The implementation of computer integrated environments (CIE) is increasing and the requirements engineering necessary for the development of these systems is critical. Requirements Engineering for Computer Integrated Environments in Construction provides an important source of information and advice for organizations needing bridge the gap between users and developers in the implementation of computer integrated solut
