

1. Record Nr.	UNINA9910830183703321
Autore	Dareing Don W.
Titolo	Engineering practice for oilfield and drilling applications // Donald W. Dareing
Pubbl/distr/stampa	Hoboken, New Jersey : , : John Wiley & Sons, Inc., , [2022] ©2022
ISBN	1-5231-5514-0 1-119-79956-2 1-119-79958-9 1-119-79957-0
Descrizione fisica	1 online resource (627 pages)
Collana	Wiley-ASME Press
Disciplina	665.5
Soggetti	Petroleum engineering - Technological innovations
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	"Mechanical engineers design and support the plant equipment, boilers, and pressure vessels used in the oil and petroleum industries, for both onshore and offshore drilling. Their tasks include developing and monitoring the performance of mechanical systems, specifying and installing equipment, and ensuring that regulatory requirements are met. There are unique industry specifications that must be taken into account when designing in this field."--
