

1. Record Nr.	UNINA9910830185303321
Autore	Hentea Mariana
Titolo	Building an effective security program for distributed energy resources and systems // Mariana Hentea
Pubbl/distr/stampa	Hoboken, New Jersey : , : John Wiley & Sons, Incorporated, , [2021] ©2021
ISBN	1-119-07043-0 1-119-07042-2 1-119-07074-0
Descrizione fisica	1 online resource (605 pages) : illustrations
Disciplina	621.310684
Soggetti	Smart power grids - Security measures
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	"This book provides a methodology for building an effective security program for distributed energy resources (DERs). It educates engineers as to the design, implementation, and maintenance of a security program suitable for control systems and the power grid. Security professionals will learn the specific requirements of industrial and control applications. The author describes the differences between the security requirements of a traditional IT system and those of industrial control systems, including SCADA systems. She provides a unified approach for building a security program for smart grid systems and applications using systems engineering techniques, standards, and best practices."--
