1. Record Nr. UNINA9910830280203321

Titolo	Renewable energy systems : modeling, optimization and applications / / edited by Sanjay Kumar [and three others]
Pubbl/distr/stampa	Hoboken, New Jersey : , : John Wiley & Sons, Inc., , [2022] ©2022
ISBN	1-119-80399-3 1-119-80401-9
Descrizione fisica	1 online resource (496 pages)
Disciplina	617.51
Soggetti	Renewable energy sources
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Intro -- Contents -- Title Page -- Copyright -- 1 Importance of Hybrid Energy System in Reducing Greenhouse Emissions -- 1.1 Introduction -- 1.2 Scenario of Climate Change in the World -- 1.3 Role of a Hybrid Framework Based on Renewable Energy -- 1.4 Proposed Model Description -- 1.5 Mathematical Model of Hybrid System -- 1.6 Simulation Model of the Hybrid Energy System -- 1.7 Results of Simulation Analysis -- 1.8 Conclusion and Discussion -- Acknowledgments -- References -- 2 Experimental Study on Tilt Angle and Orientation of Rooftop PV Modules for Maximising Power Output for Chandigarh, India -- 2.1 Introduction -- 2.2 Literature Review -- 2.3 Experimental Setup -- 2.4 Experimental Results and Discussion -- 2.5 Latitude and Optimal Tilt Angle -- 2.6 Conclusions and Future Scope -- Acknowledgment -- References -- 3 Biodiesel, Challenges and Solutions -- 3.1 Introduction -- 3.2 Significant Challenges Faced by Biodiesel -- 3.3 Conversion of Microalgae into Biodiesel -- 3.4 Microalgae Biodiesel -- 3.5 Conclusion -- References -- 4 Comparative Overview of a Novel Configuration of a DC-AC Converter with Reduced Components -- 4.1 Introduction -- 4.2 The Novel Topology -- 4.3 Performance Characteristics -- 4.4 Modulation Technique -- 4.5 Simulation Results -- 4.6 Critical Analysis of Proposed Topology with the Conventional Z-Source Inverter -- 4.7 Conclusion -- References -- 5 Intelligent Sliding Mode Controller for Wind Energy Powered DC

Nanogrid -- 5.1 Introduction -- 5.2 Overview of Wind Energy Conversion System -- 5.3 System Description -- 5.4 Controller Description -- 5.5 Results and Analysis -- 5.6 Conclusion -- References -- 6 Grid Integration of Renewable Energy Systems -- 6.1 Introduction -- 6.2 Modelling of Grid-Interconnected Solar PV System -- 6.3 Design of Grid-Interconnected Solar PV System -- 6.4 PV Inverter Control Techniques.
6.5 MATLAB/Simulink Results and Discussion -- 6.6 Conclusion -- Appendix -- References -- 7 Modeling and Analysis of Autonomous Hybrid Green Microgrid System for the Electrification of Rural Area -- 7.1 Introduction -- 7.2 Renewable Energy Technologies -- 7.3 Economic Evaluation -- 7.4 Microgrid Protection -- 7.5 Simulation Results and Discussion -- 7.6 Conclusion -- References -- 8 Performance Optimization of a Pine Oil-Fueled Agricultural Engine Using Grey - Taguchi Approach -- 8.1 Introduction -- 8.2 Experimental Setup and Procedure -- 8.3 Grey-Taguchi Analysis -- 8.4 Taguchi - SN Ratio -- 8.5 Results and Discussion -- 8.6 Conclusion -- Acknowledgment -- References -- 9 Nonlinear Mathematical Modeling and Energy Optimization of Multiple-Stage Evaporator Amalgamated with Thermo-Vapor Compressor -- 9.1 Introduction -- 9.2 Process Description -- 9.3 Nonlinear Energy Modeling -- 9.4 Formulation of the Objective Function -- 9.5 Solution Approach -- 9.6 Result and Discussion -- 9.7 Validity of the Proposed Model -- 9.8 Conclusion -- References -- 10 Fuel Cell Fed Shunt Active Power Filter for Power Quality Issue by Electric Vehicle Charging -- 10.1 Introduction -- 10.2 Specification of the Fuel Cell Integrated SAPF -- 10.3 Reference Current Generation -- 10.4 Discussion and Simulation Findings -- 10.5 Results and Discussion in Real Time -- 10.6 Conclusions -- References -- 11 In-Depth Analysis of Various Aspects of Charging Station Infrastructure for Electric Vehicle -- 11.1 Introduction -- 11.2 Classification of Electric Vehicles -- 11.3 Energy Storage Technologies Used in EVs -- 11.4 Types of Electric Vehicle Charging Station (EVCS) -- 11.5 Aspects and Challenges in the Development of EV Charging Infrastructure -- 11.6 Developments in the Sector of Electric Vehicles and its Charging Stations in India -- 11.7 Conclusion -- References.
12 Optimization of PV Electrolyzer for Hydrogen Production -- 12.1 Introduction -- 12.2 Hydrogen as a Potential Fuel for the Future -- 12.3 Properties of Hydrogen -- 12.4 Fundamental Concepts of Hydrogen Production Processes -- 12.5 System Description and Components -- 12.6 Electrochemical Equations -- 12.7 Methodology -- 12.8 Results and Discussion -- Conclusions -- References -- 13 Assessment of GAMS in Power Network Applications Including Wind Renewable Energy Source -- 13.1 Introduction -- 13.2 Importance and a User's View on GAMS Software -- 13.3 The Basic Structure in the GAMS Environment -- 13.4 Power System Applications Using GAMS Software -- 13.5 Development Trends in GAMS -- 13.6 Conclusion -- Acknowledgments -- References -- 14 Multi-Objective Design of Fractional Order Robust Controllers for Load Frequency Control -- 14.1 Introduction -- 14.2 Mathematical Model of Single Area Load Frequency Control -- 14.3 Background -- 14.4 Proposed Method to Tune PID Controller -- 14.5 Results and Discussions -- 14.6 Frequency Deviation for 0.02 p.u. Load Change -- 14.7 Conclusions -- Nomenclature -- References -- 15 Challenges and Remedies of Grid-Integrated Renewable Energy Resources -- 15.1 Introduction -- 15.2 Developing a Cost-Effective and Adequate Stand-Alone or Grid-Connected Generation System in a Hilly Area -- 15.3 Challenges of Grid-Connected Hybrid Energy System -- 15.4 Energy Management -- 15.5 Frequency Deviation -- 15.6 Voltage Deviation -- 15.7 Adequacy

Assessment of Intermittent Sources -- 15.8 Conclusion -- References -- 16 Solar Radiations Prediction Model Using Most Influential Climatic Parameters for Selected Indian Cities -- 16.1 Introduction -- 16.2 Introduction to Solar Energy -- 16.3 Energy Status -- 16.4 Existing Solar Technologies -- 16.5 Existing Solar Modeling Techniques. 16.6 Relevance for Solar Electrification in Himachal Pradesh -- 16.7 Literature Review -- 16.8 Methodology Used -- 16.9 Prediction Model Using Adaptive Neuro-Fuzzy Inference System (ANFIS) -- 16.10 Different Input Variables -- 16.11 Prediction Model for Ten Selected Cities of Himachal Pradesh -- 16.12 Sensitivity Test and Error Evaluation of SRPM Models -- 16.13 Results and Discussion of ANN Model -- 16.14 Selection of Inputs Used for Prediction Model Using ANFIS -- 16.15 ANFIS-Based Solar Radiation Prediction Models -- 16.16 Results and Discussion of ANFIS Model -- References -- 17 Quality Improvement by Eliminating Harmonic Using Nature-Based Optimization Technique -- 17.1 Introduction -- 17.2 Cascaded H-Bridge Multilevel Inverter -- 17.3 Harmonic Elimination -- 17.4 Particle Swarm Optimization (PSO) -- 17.5 Simulation Results -- 17.6 Conclusion -- References -- 18 Effect of Degradations and Their Possible Outcomes in PV Cells -- 18.1 Introduction -- 18.2 Basics of Photovoltaic Cell -- 18.3 Photovoltaic Technology -- 18.4 Degradation in Photovoltaics -- 18.5 Current Status and Challenges in Photovoltaic Technologies -- 18.6 Cost and Efficiency Trends in Photovoltaics Over the Past Decade -- 18.7 Impedance Spectroscopy (IS) - Technique to Identify Degradations in Photovoltaics -- 18.8 Conclusion -- References -- Index -- Also of Interest.

2. Record Nr. UNIORUON00385573

Autore	Tasso, Torquato
Titolo	Gerusalemme conquistata / Torquato Tasso ; a cura di Luigi Bonfigli
Pubbl/distr/stampa	Bari, : Laterza e Figli, 1934
Descrizione fisica	2 v. ; 23 cm.
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia
