

1. Record Nr.	UNINA9910830350803321
Autore	Hout Sam A.
Titolo	Sterile processing of pharmaceutical products : engineering practice, validation, and compliance in regulated environments // Sam A. Hout
Pubbl/distr/stampa	Hoboken, NJ : , : John Wiley & Sons, Inc., , 2022
ISBN	1-119-80234-2 1-119-80235-0 1-119-80233-4
Descrizione fisica	1 online resource (371 pages)
Disciplina	338.476151
Soggetti	Pharmaceutical industry
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Cover -- Title Page -- Copyright -- Contents -- Preface -- Acknowledgments -- Chapter 1 Introduction -- Chapter 2 Sterilization -- Steam Sterilization -- Flash Sterilization -- LowTemperature Sterilization Technologies -- Ethylene Oxide Gas Sterilization -- Hydrogen Peroxide Gas Plasma -- Disinfection and Surface Sterilization Using Peracetic Acid -- Ionizing Radiation -- DryHeat Sterilizers -- Filtration -- Microwave -- Vaporized Hydrogen Peroxide (VHP®) -- Ozone -- Formaldehyde Steam -- Gaseous Chlorine Dioxide -- Vaporized Peracetic Acid -- Infrared Radiation -- Sterilization Cycle Verification -- Monitoring -- Chapter 3 Sterile Manufacturing Facilities -- Chapter 4 Sanitary Process Piping and Equipment -- QA Procedures -- Standard Operating Procedures - cGMP Installations -- Heat Exchangers -- Sanitary Pumps -- Sanitary Tanks -- Instruments -- Pressure Transmitter (Various Sources) -- Temperature Transmitter (Various Sources) -- Standard Operating Procedures - cGMP Installations -- Surface Finish -- Welding -- Applicability -- Process/Procedure -- Records (General) -- Records -- Automatic Orbital Welding -- Weld Acceptance Criteria for Automatic Orbital Weld Qualifications -- Chapter 5 Passivation -- Inhouse Passivation Using Vats -- Spot Passivation -- Astro Pak UltraPass Gel Passivation -- Alternative Process -- Control of Passivated Items -- Preparing, Testing, and Adjusting Cleaning and Passivation Chemicals (Passivation

in Vats) -- Chapter 6 Chilled Water System -- Process Description -- Commissioning of HVAC -- Installation Verification - X Ton Chiller System -- System Startup - X Ton Chiller -- Functional Testing - X Ton Chiller -- Chapter 7 CleanInPlace (CIP) Systems -- Life Cycle Requirements -- Product and Process User Requirements -- Process Quality Requirements -- Process Parameter Requirements. Installation User Requirements -- Operational Requirements -- Chapter 8 Computerized Automated Systems -- Functional Requirement Specification -- Process Automation System -- EMS User Requirement Specification -- Automation Overview -- Software -- Hardware -- SCADA -- Control Panels -- Main Control Panel -- Remote I/O Panels -- Power Distribution Panels -- Instrumentation Panels -- System Functions -- System Overview -- Control Modules -- Interfaces -- User Interface (SCADA) -- PAS System Overview -- Graphical Screen Navigation -- Client EMS Area Graphical Screens -- Graphical Control Screens -- Interfaces to Equipment -- Interfaces to Other Systems -- Ethernet Network -- Nonfunctional Attributes -- Power Failure Recovery -- PLC Only Failure -- HMI Only Failure -- Network Only Failure -- Maintainability -- Backup and Recovery -- Functional Requirement Specification -- GLC Environmental Monitoring System -- Automation Overview -- System Components -- Software -- Hardware -- Control Panels -- Gateways -- System Functions -- System Overview -- Control Modules -- Interfaces -- User Interface (SCADA) -- GLC EMS Area Graphical Screen -- Global Logistics Center (GLC) Environmental Monitoring System -- Interfaces to Equipment -- Interfaces to Other Systems -- Ethernet Network -- Wireless Connections -- Nonfunctional Attributes -- Power Failure Recovery -- PLC Only Failure -- HMI Only Failure -- Network Only Failure -- Maintainability -- Backup and Recovery -- Software Module Design Specification -- Functional Requirement Specification -- Process Automation System -- Automation Overview -- System Components -- Software -- Hardware -- Control Panels -- System Functions -- System Overview -- Control Modules -- Interfaces -- User Interface (SCADA) -- PAS System Overview Screen -- Graphical Screen Navigation -- Graphical Control Screens -- Interfaces to Equipment. Interfaces to Other Systems -- Ethernet Network -- Nonfunctional Attributes -- Power Failure Recovery -- PLC Only Failure -- HMI Only Failure -- Network Only Failure -- Maintainability -- Backup and Recovery -- Software Design Specification -- Prosoft Configuration -- Enabling and Disabling of the Gateway Default Server Interface -- Temperature Sensor Settings -- Humidity Sensor Settings -- Software Design Specification -- Continuous Logic -- Module Classes and Control Modules -- Virtual Differential Pressure Alarm Disable -- Room Condition Indication -- Navigation Links -- Alarm Daily Report -- WFI Still Equipment Module Class -- WFI Silo Equipment Module Class -- EM&uscore -- SILO -- WFI Primary Loop Equipment Module Class -- EM&uscore -- PRIM&uscore -- LOOP -- WFI Supply Header Equipment Module Class -- EM&uscore -- HEADER -- Electrical - Controls Equipment Specifications -- Documentation -- Drives/Motors -- Chapter 9 Personal Protective Equipment (PPE) and Process Flow -- Chapter 10 Sterile Aseptic Processing -- Chapter 11 Integrated Facility Design -- Case Study -- Issue -- Root Cause -- Corrective Action -- Preventive Actions -- Chapter 12 Barriers and Isolators -- Isolator Design Considerations -- Chapter 13 Guidelines for Statistical Procedure -- Process Capability Analysis -- Longterm Studies -- Acceptance Sampling -- Attribute and Variable Sampling Plans -- Variable Sampling Plans - ANSI Z1.9 -- Normality -- Transformation of Nonnormal Data (Normalization) --

Protocol Sampling -- Failure Mode and Effect Analysis (FMEA) --  
Calculating or Recalculating Control Limits -- Chapter 14 Calibration --  
Contingency Plan/Disaster Recovery -- Chapter 15 Cleaning Validation  
-- New Products and Product Changes -- Cleaning Processes and  
Changes -- Risk Assessment/Matrix Approach -- Matrix Development.  
Cleaning Processes (Manual and Automated) -- CPP/CQA -- Cleaning  
Validation Life Cycle - Cleaning Method Development -- Strategy for  
Process Controls -- WorstCase Identification - Product/Component --  
Equipment -- Validation Tests/Inspections - Visual Inspection --  
Chemical Testing -- Microbiological Testing -- Endotoxin Testing --  
Sampling Methods -- Direct Swab Sampling -- Rinse Sampling --  
Coupon Testing -- Sampling Sites -- Acceptance Criteria -- Residual  
Levels -- Endotoxin Levels -- Microbiological Levels -- Cleaning  
Agents/Sanitizer Validation Studies -- Hold Time Development -- Dirty  
Hold Time -- Clean Hold Time -- Additional Hold Times/Cleaning  
Frequencies -- Continuous Process Verification -- Failure  
Investigations -- Chapter 16 Validation of Filling Equipment -- Chapter  
17 Manufacturing Process Validation -- Stage 2 - Process Qualification  
-- Appendix A Installation Test Plans -- Appendix B Operational Tests  
Plans -- Appendix C WFI Turbulence Flow Requirements -- Appendix D  
Water For Injection (WFI) - Design Requirements -- Process Description  
-- Specifications -- Life Cycle Requirements -- Product and Process  
User Requirements -- Product Description -- Operating Ranges --  
Material of Construction -- Metallics -- Plastics -- Elastomers -- Glass  
-- Welding Requirements -- Construction Requirements -- Lubrication  
Requirements -- Electrical Requirements -- Safety Requirements --  
Operational Requirements -- Process Constraints and Limitations --  
Process Control System -- Operator Interface -- Power Loss and  
Recovery -- Cleaning and Sanitizing -- Maintenance Requirements --  
Training and Documentation Requirements -- Appendix E Solution  
Transfer System (STS) - Design Requirements -- System Description --  
Bulk Powder Handling System -- Glossary -- Nomenclature --  
References -- Further Reading -- Index -- EULA.
