Sommario/riassunto	In a fast changing world governed by innovative Enterprise Services and the Future Internet, the issue of Enterprise Interoperability is no longer limited to the interoperation of systems within a single company, but has become a much greater multi-view issue of interoperability throughout a Network of Enterprises.This book contains the proceedings of 13 workshops presented as short papers and discussions held at each workshop. The workshops were co-located with theI-ESA'12 Conference organized by the Polytechnic University of Valencia, Spain.Complementary to the conferenc
