

1. Record Nr.	UNINA9910830410303321
Titolo	Handbook of Optical Systems . Volume 4 Survey of Optical Instruments // editors, Herbert Gross, Fritz Blechinger, Bertram Ahtner
Pubbl/distr/stampa	Hoboken : , : John Wiley & Sons, Inc., , 2008
ISBN	3-527-69924-4
Descrizione fisica	1 online resource (xxviii, 1064 pages)
Disciplina	681.4
Soggetti	Optical instruments Optics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	Preface XIX Introduction XXI 46 Interferometry 1 46.1 Introduction 3 46.2 Basic Principles of Interference 4 46.3 Interferometers 44 46.4 Interferometer Designs 81 46.5 Detection Techniques and Algorithms 95 46.6 Calibration Techniques 120 46.7 Dynamic Range 140 46.8 Accuracy and Error Sources 148 46.9 Literature 175 47 Non- interferometric Wavefront Sensing 181 47.1 Introduction 183 47.2 Hartmann Shack Sensor 183 47.3 Hartmann Sensor 208 47.4 Phase Space Analyzer 219 47.5 Point Image Filtering Techniques 230 47.6 Other Wavefront Sensor Concepts 239 47.7 Point Spread Function Retrieval 249 47.8 Calculation of Wavefront and Zernike Coefficients 283 47.9 Literature 297 48 Radiometry 303 48.1 Introduction 304 48.2 Basic Principles of Radiometry 305 48.3 Monochromators 341 48.4 Spectrometers 402 48.5 Literature 427 49 Image Analysis 431 49.1 Introduction 432 49.2 Basic Principles of Image Analysis 432 49.3 Star Test, Slit Test 436 49.4 Test Targets, Visual Inspection 450 49.5 Distortion Metrology 452 49.6 Deflectometers 464 49.7 Pattern and Fringe Projectors 471 49.8 Literature 485 50 Distance and Angle Metrology 489 50.1 Introduction 490 50.2 Long-range Displacement Metrology 490 50.3 Short-range Displacement and Thickness Metrology 515 50.4 Angle and Tilt Metrology 524 50.5 Combined Distance and Angle Metrology 540 50.6 Optical Profile Metrology 548 50.7 Literature 555 51 Polarimetry 559 51.1 Introduction 560 51.2 Basic principles of Polarimetry 561 51.3 Polarizing Elements 572 51.4

---

Sommario/riassunto

Optical systems have a wide range of technical applications (e.g. viewing devices, lens systems) and uses in industrial manufacturing. And while the design of optical systems requires a high level of expertise, there is, to date, no resource available, which allows beginners to learn optical design.
