

1. Record Nr.	UNINA9910830421603321
Titolo	Uncertainty and Artificial Intelligence : Additive Manufacturing, Vibratory Control, Agro-Composite, Mechatronics // edited by Abdelkhalak El Hami
Pubbl/distr/stampa	London, England : , : ISTE Ltd, , [2023] ©2023
ISBN	1-394-25533-0 1-394-25535-7
Edizione	[First edition.]
Descrizione fisica	1 online resource (203 pages)
Disciplina	006.3
Soggetti	Artificial intelligence
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Cover -- Title Page -- Copyright Page -- Contents -- Preface -- Chapter 1. New Intelligence Method for Machine Tool Energy Consumption Estimation -- 1.1. Introduction -- 1.2. Mathematical model for estimating power consumption by the spindle and table of a mill -- 1.3. ICA method -- 1.3.1. Pretreatment of signals -- 1.3.2. Separation -- 1.4. Results and discussion -- 1.5. Conclusion -- 1.6. References -- Chapter 2. Uncertainty and Artificial Intelligence: Applications to Maintenance in Additive Manufacturing -- 2.1. Introduction -- 2.2. Integration of uncertainty -- 2.2.1. Definition of uncertainty -- 2.2.2. Types of uncertainty -- 2.3. Uncertainty in artificial intelligence -- 2.3.1. Concepts and challenges in artificial intelligence -- 2.3.2. Implementing artificial intelligence -- 2.3.3. Decision-making in the case of uncertainty -- 2.4. Artificial intelligence in additive manufacturing -- 2.4.1. Notions and issues in additive manufacturing -- 2.4.2. Uncertainty in additive manufacturing -- 2.4.3. Probable failure scenarios in additive manufacturing -- 2.4.4. Integration of artificial intelligence -- 2.5. Predictive maintenance in additive manufacturing -- 2.5.1. Tendencies in maintenance technology -- 2.5.2. Diagnostic and prognostic models -- 2.5.3. Implementation in additive manufacturing -- 2.6. Proposed strategy and applications -- 2.6.1. Examples of uncertainty in additive

manufacturing -- 2.6.2. Advanced system of quality control in additive manufacturing -- 2.7. Conclusion -- 2.8. References -- Chapter 3. Bio-Composite Structural Durability: Using Artificial Intelligence for Cluster Classification -- 3.1. Introduction -- 3.2. The state of acoustic emission technology -- 3.2.1. Definition -- 3.2.2. Applications of acoustic emissions -- 3.2.3. Mechanisms responsible for AE in materials -- 3.2.4. Propagation of waves through materials. 3.2.5. Phenomenological approach to acoustic emissions -- 3.3. The concept behind classification -- 3.3.1. Introduction -- 3.3.2. Statistical analysis in the identification of different source mechanisms -- 3.3.3. Classification method -- 3.4. Application to the classification of damage mechanisms in agro-composites -- 3.4.1. Fabrication of agro-composite test tubes -- 3.4.2. Characterization of tensile tests -- 3.4.3. Classification of damage mechanisms -- 3.5. Artificial neural networks for classifying damage -- 3.5.1. Introduction -- 3.5.2. Organization of neurons -- 3.5.3. How the neural network functions -- 3.5.4. Results and analysis -- 3.6. Conclusion -- 3.7. References -- Chapter 4. Intelligent Control for Attenuating Vertical Vibrations in Vehicles -- 4.1. Introduction -- 4.2. Limits of passive and semi-active control strategies -- 4.2.1. Limits of passive suspension -- 4.2.2. Limits of semi-active suspension -- 4.3. Model-free control (MFC) -- 4.3.1. Ultra-local model -- 4.3.2. Online estimates of modeled and non-modeled perturbances -- 4.3.3. Intelligent controller -- 4.4. Application to the control of vertical vehicular vibrations -- 4.4.1. Performance demands -- 4.4.2. Complete vehicular model -- 4.4.3. Ultra-local models -- 4.4.4. MFC equation -- 4.4.5. Numerical simulation -- 4.5. Conclusion -- 4.6. References -- Chapter 5. Optimization of the Power Inductor of a DC/DC Converter -- 5.1. Introduction -- 5.2. Description of the power inductor -- 5.3. Thermomechanical modeling of the power inductor -- 5.3.1. Thermal modeling -- 5.3.2. Thermomechanical modeling -- 5.4. Optimization methods -- 5.4.1. Covariance matrix adaptation-evolution strategy (CMA-ES) -- 5.4.2. Covariance matrix adaptation-evolution strategy assisted by kriging (KA-CMA-ES) -- 5.5. Optimization of the power inductor -- 5.5.1. Description of the optimization problem. 5.5.2. Results and discussion -- 5.6. Conclusion -- 5.7. References -- Chapter 6. Study of the Influence of Noise and Speed on the Robustness of Independent Component Analysis in the Presence of Uncertainty -- 6.1. Introduction -- 6.2. The model studied -- 6.3. Construction of the road surface profile -- 6.4. The principle of the ICA method -- 6.5. Monte Carlo technique -- 6.6. Results and discussion -- 6.6.1. Implementation of the ICA approach -- 6.6.2. Influence of noise -- 6.6.3. Influence of speed -- 6.7. Conclusion -- 6.8. References -- Chapter 7. Multi-Objective Optimization Applied to a High Electron Mobility Transistor -- 7.1. Introduction -- 7.2. Description of HEMT technology -- 7.3. Multi-physical modeling of the HEMT -- 7.3.1. Electro-thermal modeling of the HEMT -- 7.3.2. Thermomechanical modeling of the HEMT -- 7.4. The multi-objective optimization approach -- 7.4.1. Fast non-dominated sorting -- 7.4.2. Crowding distance -- 7.5. Multi-objective optimization applied to HEMT technology -- 7.5.1. Description of the optimization problem -- 7.5.2. Results and discussion -- 7.6. Conclusion -- 7.7. References -- List of Authors -- Index -- EULA.
