

1. Record Nr.	UNINA9910830454603321
Titolo	Chronic obstructive pulmonary disease [[electronic resource] /] / [edited by] Robert A. Stockley ... [et al.]
Pubbl/distr/stampa	Malden, MA ; ; Oxford, : Blackwell Pub., 2007
ISBN	1-281-32056-0 9786611320560 0-470-75597-0 0-470-75528-8
Descrizione fisica	1 online resource (916 p.)
Altri autori (Persone)	StockleyRobert A
Disciplina	616.2/4 616.24
Soggetti	Lungs - Diseases, Obstructive Lungs - Diseases
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Chronic Obstructive Pulmonary Disease; Contents; Contributors; Preface; Section 1: Physiology; 1 Structure-Function Relationships: The Pathophysiology of Airflow Obstruction; 2 The Physiology of Breathlessness; 3 The Physiology of Muscle; 4 Exercise Limitations and Cardiopulmonary Exercise Testing in Copd; 5 Clinical Assessment of Control of Breathing; 6 Physiology and Pathobiology of the Lung Circulation; 7 Sleep In Patients With Copd; 8 The Physiology of Cough; 9 The Physiology of Gas Exchange; Section 2: COPD and allied conditions; 10 The Natural History of Copd; 11 Cystic Fibrosis 12 Bronchiectasis and Copd13 Obliterative Bronchiolitis; 14 Asthma; 15 Copd: Clinical Presentation and Evaluation; 16 Monitoring and Outcomes; Section 3: Host Defences and Inflammation; 17 Mucociliary Clearance; 18 Mucosal Immunity; 19 Copd and Pulmonary Surfactant; 20 The Macrophage and Its Role in the Pathogenesis of Copd; 21 Eosinophils and Copd; 22 Airway Epithelial Defence, Repair and Regeneration; 23 The Role of The Neutrophil In The Pathogenesis of Copd; 24 Lymphocytes; 25 Cytokines; 26 Leukotrienes In Copd: The Unexploited Potential

27 Cigarette Smoking, Emphysema and Lung Endothelium
28 Mesenchymal Cells of the Lung; Section 4: Pathogenesis; 29 Lung Development; 30 Animal Models; 31 Proteinases and Copd; Colour Plate Section Falls Between Pp. 354 and 355; 32 Oxidants; 33 Cigarette Smoke-Induced Disease; 34 Copd and Air Pollution; 35 Viruses in Copd; 36 Bacteria; 37 Genetic Factors; 38 1-Antitrypsin Deficiency; 39 Body Weight and Systemic Effects; 40 Lung Connective Tissue; Section 5: Clinical Considerations and Complications; 41 Aerosols and Delivery Systems; 42 Gastro-Oesophageal Reflux; 43 Upper Airway Diseases
44 Acute Pulmonary Embolism
45 Copd and Lung Cancer; 46 Infection Management and Airflow Obstruction; 47 Mechanical Ventilation For Exacerbation of Copd; 48 Comorbidity; Section 6: Current and Future Treatment; 49 Primary Care; 50 Pulmonary Rehabilitation; 51 Social Support; 52 Long-Term Invasive Mechanical Ventilation; 53 Smoking Cessation; 54 Oxygen Therapy in Copd; 55 Surgical Therapy For Copd; 56 Anticholinergics in Copd; 57 2-Agonists; 58 Corticosteroids; 59 Phosphodiesterase 4 Inhibitors In The Treatment of Copd; 60 Antibiotic Therapy in Patients With Copd; 61 Antioxidants
62 Mucolytics For Copd
63 End-of-Life and Palliative Care for Patients With Copd; 64 Economic Burden of Copd; 65 Pharmacoepidemiology of Copd; 66 Social and Behavioural Impact of Copd ... Research Opportunities; 67 Guidelines; Section 7: Pharmacotherapy: Developing Therapies; 68 Protease Inhibitors; 69 Retinoids; 70 Chemokines in Copd; Index

Sommario/riassunto

The only international clinical textbook for COPD - one of the top 5 causes of death and disability worldwide
The only COPD textbook to include the latest national and international guidelines and the newer therapeutic agents in COPD treatment
International team of contributors covers all aspects of COPD - from physiology and epidemiology to diagnosis and treatment
Everything the busy physician needs to understand, diagnose and treat the COPD patient: - Structure and physiology of the respiratory system- Clinical considerations and allied
