Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	"Social inclusion and exclusion are pervasive aspects of social life. Understanding when exclusion is legitimate or wrong reflects an understanding of morality. While there are times when exclusion is legitimate and fosters group functioning, there are also times when it reflects prejudicial biases and stereotypic expectations. How children weigh fairness and stereotypic expectations when making exclusion decisions is determined by their understanding of group norms, social identity, and friendships with children from other backgrounds. In our contemporary global society, few topics are as timely or pressing as exclusion. Children and Social Exclusion: Morality, Prejudice, and Group Identity delves deeply into the origins of prejudice and the emergence of morality to explain why children include some and exclude others and sheds light on the origins of stereotyping, prejudice, and social justice. By tackling these important issues from a global perspective,

Children and Social Exclusion: Morality, Prejudice, and Group Identity illustrates how the concept of exclusion might be better understood in multiple cultures and reveals its implications in regions of conflict in the world"--

Sommario/riassunto	The preservation of South Africa's indigenous languages – the extinct Bushman and Khoikhoi languages in particular – is a pressing concern. Voices Past and Present serves as a comprehensive, scholarly and practical source for documenting and preserving some of them. The subcontinent of Africa has been inhabited by Bushman, Khoikhoi and Bantu-speaking peoples for thousands of years, and, for the past few centuries, also by European-speaking peoples. Contact between these peoples brought about changes in the different languages. As a result, modern languages are no longer identical to the original ones, many of which, especially in the case of the Bushman and Khoikhoi languages, have become extinct. Words used in ancient times and recorded long ago often bear no resemblance to their modern counterparts. In this book, Peter E. Raper provides a detailed investigation of the earliest recordings of words available. Words from Old Cape dialects are

compared for correspondences in sound and meaning to words from 29 Bushman languages and dialects, as well as to words from Nama, Koranna, Griqua, !Xuhn, !Xoon, Khwe and N/uu. Voices Past and Present provides an extensive corpus of words that can be further utilised for the purpose of shedding light on the specific languages from which the recorded words (and names) were derived, on historical distribution of the various groups, on the classification of the different languages and peoples, for determining relationships or otherwise between the different languages, potentially identifying components of place-names and ethnonyms from ancient and extinct languages, and elucidating other matters that have long vexed scholars who have complained about a lack of recorded data.
