

1. Record Nr.	UNINA9910830475703321
Titolo	Handbook of battery materials [[electronic resource] /] / Jurgen O. Besenhard, (ed.)
Pubbl/distr/stampa	Weinheim ; ; New York, : Wiley-VCH, c1999
ISBN	1-282-02531-7 9786612025310 3-527-61167-3 3-527-61166-5
Descrizione fisica	1 online resource (649 p.)
Altri autori (Persone)	BesenhardJurgen O
Disciplina	621.31242
Soggetti	Electric batteries Electric batteries - Materials Storage batteries
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Handbook of Battery Materials; Contents; List of Contributors
Sommario/riassunto	Batteries find their applications in an increasing range of every-day products: discmen, mobile phones and electric cars need very different battery types.This handbook gives a concise survey about the materials used in modern battery technology. The physico-chemical fundamentals are as well treated as are the environmental and recycling aspects. It will be a profound reference source for anyone working in the research and development of new battery systems, regardless if chemist, physicist or engineer.
