

1. Record Nr.	UNINA9910830504703321
Autore	Phillips Clive J. C.
Titolo	Cattle Behaviour and Welfare [[electronic resource]]
Pubbl/distr/stampa	Hoboken, : Wiley, 2008
ISBN	1-280-21352-3 9786610213528 0-470-70879-4 0-470-75241-6 1-4051-4743-1
Edizione	[2nd ed.]
Descrizione fisica	1 online resource (274 p.)
Disciplina	636.2083
Soggetti	Animal behavior Cattle - Behavior Behavior Cattle Agriculture Earth & Environmental Sciences Animal Sciences
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di contenuto	1. Introduction to Cattle Welfare -- 2. The Welfare of Dairy Cows -- 3. The Welfare of Beef Cattle and Draft Oxen -- 4. The Welfare of Calves -- 5. The Welfare of Cattle During Transport, Marketing and Slaughter -- 6. Environmental Perception and Cognition -- 7. Acquisition of Behaviour and the Use of Selective Breeding to Improve Welfare -- 8. Play Behaviour -- 9. Social Behaviour -- 10. Nutritional Behaviour -- 11. Reproductive Behaviour -- 12. Locomotion and Movement -- 13. Resting Behaviour -- 14. Behavioural Adaptation to Inadequate Environments -- 15. The Relationship Between Cattle and Man.
Sommario/riassunto	Cattle are one of our major domesticated animals, a higher mammal with complex mental and physical needs. The benefit of a knowledge of cattle behaviour means veterinarians and stockpeople can recognise abnormal behaviour signs for disease diagnosis and indication of an

inadequate environment. This book replaces the book Cattle Behaviour, written by the same author and published by Farming Press in 1993. The text has been revised and updated and four new chapters on cattle welfare have been added. The main interest of many reading a book on behaviour is its relation to the welfare of the species.
