

1. Record Nr.	UNINA9910830543003321
Autore	Liu Jian (Electrical engineer)
Titolo	Fault location and service restoration for electrical distribution systems // Jian Liu [and five others]
Pubbl/distr/stampa	Singapore : , : Wiley : , : China Electric Power Press, , 2016 ©2016
ISBN	1-118-95027-5 1-118-95026-7
Descrizione fisica	1 online resource (314 p.)
Disciplina	621.319/130288
Soggetti	Electric power systems - Maintenance and repair Electric fault location Electric power distribution
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Title Page; Table of Contents; About the Authors; Preface; 1 Progresses and Prospects for Fault Processing in Distribution Grids; 1.1 Introduction; 1.2 Progresses in Local Intelligence-Based Fault Processing; 1.3 Progresses in Distributed Intelligence-Based Fault Processing; 1.4 Progresses in Centralized Intelligence-Based Fault Processing; 1.5 Progresses in Single-Phase Grounding Fault Processing; 1.6 Prospects; 2 Fault Processing Based on Local Intelligence; 2.1 Introduction; 2.2 Fault Processing Based on Local Intelligence for Distribution Networks 2.3 Fault Protection of the Active Distribution Network 2.4 Coordination of Multistage Protection in the Distribution Network; 2.5 Summary; 3 Fault Processing Based on Distributed Intelligence; 3.1 Introduction; 3.2 FA based on Recloser and Voltage-Delay Type Sectionalizers; 3.3 Reclosing with the Fast Over-Current Protection Mode; 3.4 Fast Healing Approach based on Neighbor Communication; 3.5 Conclusion and Summary; 4 Fault Processing Based on Centralized Intelligence; 4.1 Introduction; 4.2 Simplified Modeling of Distribution Grids; 4.3 Interphase Short Circuit Fault Location 4.4 Fault Isolation and Service Restoration 4.5 Conclusion and Summary;

5 Single Phase to Ground Fault Processing; 5.1 Types of Ground Fault and Protection Strategy; 5.2 Detection of High Resistance Ground Faults in Low Resistance Grounded Systems; 5.3 Grounding Protection in the System with Neutral Isolated; 5.4 Grounding Protection in the System with Neutral Grounded Through an Arc Suppression Coil; 5.5 Single-Phase-to-Ground Fault Feeder Selection Technology in a Power Distribution System with Neutral Non-Effectively Grounded
5.6 Prevention of and Protection from Single-Phase-to-Ground Faults in Power Distribution Systems with Neutral Non-Effectively Grounded
5.7 Single-Phase-to-Ground Fault Location in Systems with Neutral Non-Effectively Grounded; 5.8 Conclusion and Summary; 6 Practical Aspects of Fault Processing; 6.1 Introduction; 6.2 Coordination of Fault Processing Approaches; 6.3 Planning of Terminal Units; 6.4 Verification of the Property of Fault Processing; 6.5 Conclusion and Summary; References; Index; End User License Agreement
