

1. Record Nr.	UNINA9910830563603321
Titolo	Simulation and wargaming // edited by Charles Turnitsa, Curtis Blais, Andreas Tolk
Pubbl/distr/stampa	Hoboken, NJ : , : John Wiley & Sons, Inc., , 2022
ISBN	1-119-60480-X 1-119-60481-8 1-119-60479-6
Descrizione fisica	1 online resource (466 pages)
Disciplina	793.9
Soggetti	War games Simulation methods
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	"Wargaming is a technique employed in the military, in business, and in other enterprises where planning and risk are part of the decision-making process. In wargaming, as an analytical and decision support approach, a scenario is presented in the form of a formal game. The players of the game will then make decisions based on that scenario, and these will be adjudicated by a referee. The results of that adjudication are then used to illustrate to the players of the game (and to derive insights and lessons learned), based on how effective those decisions are deemed to be."--
