

1. Record Nr.	UNINA9910830581003321
Titolo	Cellular Signaling and Innate Immune Responses to RNA Virus Infections // edited by Allan R. Brasier, Adolfo Garcia-Sastre, Stanley M. Lemon
Pubbl/distr/stampa	Hoboken : , : John Wiley & Sons, Inc., , 2014
ISBN	1-68367-141-4
Descrizione fisica	1 online resource (436 pages) : illustrations
Disciplina	571.7
Soggetti	Cellular signal transduction
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	Divided into two major sections, this volume synthesizes recent findings in this fast-moving field while also reviewing accepted knowledge. The first part focuses on the antiviral signaling pathways in the host, including specific pattern recognition receptors (PRRs) and how these cellular alarms signal the innate immune response. The second section examines the ways in which specific major RNA virus families interact with, activate, and elude these signaling pathways and responses.
