

1. Record Nr.	UNINA9910830591603321
Autore	Grosjean Henri
Titolo	Modification and Editing of RNA / / Henri Grosjean, Rob Benne
Pubbl/distr/stampa	Hoboken, New Jersey : , : John Wiley & Sons, Inc., , 2014
ISBN	1-68367-268-2
Descrizione fisica	1 online resource (xiii, 596 pages) : illustrations
Disciplina	572.88
Soggetti	RNA editing
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This Comprehensive, current text explores the manifold ways in which living cells respond to genomic injury and alterations, including both spontaneous and environmentally induced DNA damage. With more than 4,000 complete references to primary research literature and over 380 color figures throughout, this book is an important text for all courses in DNA repair and mutagenesis. It will also serve as a major reference for all molecular biologists working in cancer biology, recombination, transcription and gene regulation, DNA replication, environmental studies, and biological evolution.
