

1. Record Nr.	UNINA9910830653503321
Autore	Hodges Richard P
Titolo	Underwater acoustics [[electronic resource]] : analysis, design, and performance of sonar / / Richard P. Hodges
Pubbl/distr/stampa	Hoboken, NJ, : Wiley, 2010
ISBN	1-5231-1833-4 1-119-95749-4 1-280-76827-4 9786613679048 0-470-66524-6 0-470-66528-9
Descrizione fisica	1 online resource (373 p.)
Disciplina	620.25 621.389/5
Soggetti	Underwater acoustics Sonar - Mathematical models Elastic wave propagation
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	UNDERWATER ACOUSTICS; Contents; About the Author; Preface; Acknowledgements; 1 Introduction to Sonar; 2 The Sonar Equations; 3 Transducers, Directionality, and Arrays; 4 Active Sonar Sources; 5 Transmission Loss; 6 Transmission Loss: Interaction with Boundaries; 7 Ambient Noise; 8 Reverberation; 9 Active Target Strength; 10 Radiated Noise; 11 Self Noise; 12 Statistical Detection Theory; 13 Methodology for Calculation of the Recognition Differential; 14 False Alarms, False Contacts, and False Targets; 15 Variability and Uncertainty; 16 Modeling Detection and Tactical Decision Aids 17 Cumulative Probability of Detection 18 Tracking, Target Motion Analysis, and Localization; 19 Design and Evaluation of Sonars; A Fourier Transforms; B Analysis of Errors Associated with a Least Squares Methodology; Index
Sommario/riassunto	Offering complete and comprehensive coverage of modern sonar

spectrum system analysis, Underwater Acoustics: Analysis, Design and Performance of Sonar provides a state-of-the-art introduction to the subject and has been carefully structured to offer a much-needed update to the classic text by Urick. Expanded to included computational approaches to the topic, this book treads the line between the highly theoretical and mathematical texts and the more populist, non-mathematical books that characterize the existing literature in the field. The author compares and contrasts different techni
