Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	pt. 1. State of the art -- pt. 2. Approaches to semi-supervised classification -- pt. 3. Contributions to unsupervised classification, algorithms to detect the optimal number of clusters.
Sommario/riassunto	This book provides a detailed and up-to-date overview on classification and data mining methods. The first part is focused on supervised classification algorithms and their applications, including recent research on the combination of classifiers. The second part deals with unsupervised data mining and knowledge discovery, with special attention to text mining. Discovering the underlying structure on a data set has been a key research topic associated to unsupervised techniques with multiple applications and challenges, from web-content mining to the inference of cancer subtypes in genomic mic

Sommario/riassunto

Uzbekistan is the world's fifth-largest producer and second-largest exporter of cotton in the world, and unlike other countries where child labor is common, it is Uzbekistan's official policy to employ children. This book discusses the use of child labor in cotton cultivation in Uzbekistan following the fall of the Soviet Union, drawing on extensive field investigations and in-depth interviews with human rights activists, government officials, and social workers.
