1. Record Nr. UNINA9910830713403321

Autore	Herbin Herve
Titolo	Infrared observation of Earth's atmosphere / / Herve Herbin, Philippe Dubuisson
Pubbl/distr/stampa	Hoboken, NJ : , : Wiley, , 2015
ISBN	1-119-01850-1 1-119-01849-8 1-119-01852-8
Descrizione fisica	1 online resource (197 p.)
Collana	Earth system -- environmental sciences
Disciplina	551.5/2
Soggetti	Atmospheric physics Environmental sciences Infrared astronomy Radiative transfer Atmosphere - Remote sensing Atmospheric radiation
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Table of Contents; Title; Copyright; Acknowledgements; List of Symbols; List of Acronyms; Preface; Introduction; Chapter 1: Basic Physics of the Atmosphere and Radiation; 1.1. Structure and composition of Earth?s atmosphere; 1.2. Atmospheric aerosols; 1.3. Clouds; 1.4. Radiation in Earth?s atmosphere; 1.5. Radiation budget of the climate system; 1.6. For further information; Chapter 2: Instrumentation and Sensors; 2.1. Platforms, satellites and sensors; 2.2. Infrared detection techniques; 2.3. For further information; Chapter 3: Forward Radiative Transfer in Absorbing Atmosphere 3.1. Gaseous absorption and emission3.2. Radiative transfer equation in an absorbing medium; 3.3. Solving the RTE; 3.4. For further information; Chapter 4: Forward Radiative Transfer in Scattering Atmosphere; 4.1. Atmospheric scattering; 4.2. Polarization; 4.3. Radiative transfer equation (RTE) in a scattering medium; 4.4. Numerical methods to solve the RTE in a scattering plane?parallel medium; 4.5. List of radiative transfer codes; 4.6. For further

information; Chapter 5: Methods of Geophysical Parameter Retrieval; 5.1. Inversion process; 5.2. Linear models; 5.3. Nonlinear inversion 5.4. Optimal estimation method (OEM)5.5. Lookup tables; 5.6. For further information; Chapter 6: Space Infrared Remote Sensing: Some Applications; 6.1. Water vapor isotopologues; 6.2. Biomass fires and trace gases; 6.3. Volcanic eruptions; 6.4. Physical properties of clouds; 6.5. For further information; Appendix; Bibliography; Index; End User License Agreement
