| Sommario/riassunto | Der antiken Mythologie auf den Grund gehen. Wer kennt sie nicht, die jahrtausendealten Mythen um die großen Figuren wie Achilleus oder Aeneas, Antigone oder Ariadne? So alt wie der Mythos selbst ist die wechselvolle Geschichte der variantenreichen Interpretationen und Umdeutungen. Vor dem Hintergrund der Epochen und Nationalkulturen gehen die international renommierten Wissenschaftler in 85 Lexikoneinträgen der Frage nach: Was hat Literaten, Musiker und bildende Künstler motiviert, eine antike Gestalt immer wieder aufs Neue mit Leben zu füllen? Der Supplementband stößt ein neues Tor zur Erforschung der Mythenrezeption auf. |

Sommario/riassunto

Water Wells and Boreholes provides the necessary scientific background together with practical advice using global case studies, in an accessible easy to use style suitable for both postgraduates/researchers and practitioners. The book begins with an introduction to the type and uses of water wells from water supply and irrigation through to groundwater remediation. It then covers well siting detailing how to source data from geophysical surveys, remote sensing etc. Well design is then summarised to ensure the well is stable and cost-effective. The book ends with three chapters coveri

Sommario/riassunto

This volume will concentrate its search for religious individuality on texts and practices related to texts from Classical Greece to Late Antiquity. Texts offer opportunities to express one's own religious experience and shape one's own religious personality within the boundaries of what is acceptable. Inscriptions in public or at least easily accessible spaces might substantially differ in their range of expressions and topics from letters within a sectarian religious group (which, at the same time, might put enormous pressure on conformity among its members, regarded as deviant by a majority of contemporaries). Furthermore, texts might offer and advocate new practices in reading, meditating, remembering or repeating these very texts. Such practices might contribute to the development of religious individuality, experienced or expressed in factual isolation, responsibility, competition, and finally in philosophical or theological reflections about "personhood" or "self". The volume develops its topic in three sections, addressing personhood, representative and charismatic individuality, the interaction of individual and groups and practices of reading and writing. It explores Jewish, Christian, Greek and Latin texts.
