#### Sommario/riassunto

Why are honour killings and honour-related violence (HRV) so important to understand? What do such crimes represent? And how does HRV fit in with Western views and perceptions of Islam? This distinctively comparative collection examines the concept of HRV against women in general and Muslim women in particular. The issue of HRV has become a sensitive subject in many South Asian and Middle Eastern countries and it has received the growing attention of the media, human rights groups and academics around the globe. However, the issue has yet to receive detailed academic study in the United Kingdom.

Plant Breeding Reviews presents state-of-the-art reviews on plant breeding and genetics covering horticultural, agronomic and forestry crops, incorporating both traditional and molecular methods. The contributions are authored by world authorities, anonymously reviewed, and edited by Professor Jules Janick of Purdue University, USA. The series is an indispensable resource for crop breeders, plant scientists, and teachers involved in crop improvement and genetic resources. Initiated in 1983, Plant Breeding Reviews is published in the form of one or two volumes per year. Recently
