Development Rights and Compensation in the Plan-Making Process

Sommario/riassunto

The magnitude of investment, the long time-frames involved and the influence of pre-existing infrastructure on urban infrastructure provision make a co-ordinated approach to forward-planning, policy development and implementation essential. There are major challenges in making decisions on urban infrastructure and getting management structures and processes in place. Getting it right generates long-term dividends; getting it wrong involves major costs, often borne by taxpayers. Urban Infrastructure: finance and management is posited on a strong belief that the physical structure
