

1. Record Nr.	UNINA9910830847103321
Autore	Krob Daniel
Titolo	Model-based systems architecting / / Daniel Krob
Pubbl/distr/stampa	Hoboken, New Jersey : , : John Wiley and Sons Inc, , [2022] ©2022
ISBN	1-119-98849-7 1-119-98847-0
Descrizione fisica	1 online resource (276 pages)
Disciplina	620.001171
Soggetti	System design Systems engineering
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Model-based Systems Architecting is a key tool for designing complex industrial systems. It is dedicated to the working systems architects, engineers and modelers, in order to help them master the complex integrated systems that they are dealing with in their day-to-day professional lives. It presents the CESAMES Systems Architecting Method (CESAM), a systems architecting and modeling framework which has been developed since 2003 in close interaction with many leading industrial companies, providing rigorous and unambiguous semantics for all classical systems architecture concepts. This approach is practically robust and easy-to-use: during the last decade, it was deployed in more than 2,000 real system development projects within the industry, and distributed to around 10,000 engineers around the globe.
