Titolo	Le faubourg du Mdn à Damas à l'époque Ottomane : espace urbain, société et habitat (1742-1830) // Brigitte Marino
Pubbl/distr/stampa	Presses de l'Ifpo, 1997 France : , : Presses de l'Ifpo, , 2013
ISBN	2-35159-450-9 2-8218-1984-6
Descrizione fisica	1 online resource (431 pages) : illustrations
Collana	Etudes arabes, medievals et modernes, ; no PIFD 160
Disciplina	956.91/44
Soggetti	Regions & Countries - Asia & the Middle East History & Archaeology Middle East Maydan (Damascus, Syria) History 18th century Maydan (Damascus, Syria) History 19th century
Lingua di pubblicazione	Francese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di contenuto	Includes bibliographical references and index.
Sommario/riassunto	Stretching on either side of the road leading to the regions south of Damascus, the suburb of Mdn owes its development in large part to the passage of the caravan of pilgrimages to the Holy Places of La Mekke and Medina and to the marketing of cereals from awrn and Biq '. From the Mamluk era, several urban cores appeared in this peripheral space of Damascus; their growth, as well as the creation of housing estates and the multiplication of wheat warehouses along the road will participate, in the Ottoman era, in the constitution of the urban fabric of a large suburb. Through the chronicles, this one appears as the den of the local janissaries who, throughout this period, will oppose, in numerous and bloody conflicts, the imperial janissaries, installed in the citadel and the districts which are close to it . Analysis of the documents kept in the archives of the city's courts (acts of inheritance, real estate transactions, acts of purchase and rental in rural areas, acknowledgments of debts, etc.) completes the information drawn from these chronicles; it makes it possible to apprehend the

various social groups which make up the population of this suburb and to locate them in the whole of Damascene society.

Livello bibliografico	Monografia
Note generali	Includes index.
Sommario/riassunto	FIDIC contracts are the most widely used engineering standard form contracts internationally but until 2017 the three main forms (the Red, Yellow and Silver Books) had not been amended or updated for nearly two decades, since the first editions were published in 1999. Written by a specialist lawyer who was member of the FIDIC Updates Task Group responsible for writing the new contracts, this book examines in detail the many substantial changes they have introduced. After providing an overview the contracts are examined clause by clause with the aim of showing how each compares and contrasts with the others and how the second editions compare and contrast with the first. The first chapter describes how the Red, Yellow and Silver Books evolved from earlier contract forms and the distinctive characteristics of each, before

providing an overview of the updates, including new potential risks for both Employer and Contractor, and then examining, in the second chapter, key general provisions such as the new rules on notices and limitation of liability. Chapter 3 examines the enhanced role of the Engineer in the Red and Yellow Books/Employer's Representative's function in the Silver including the new procedure for determinations as well as the Employer's obligations and contract administration. The Contractor's obligations are considered in chapter 4 while chapter 5 examines his responsibility for design in the Yellow and Silver Books. Chapters 6 to 14 deal respectively with plant, materials and workmanship and staff and labour; time-related provisions in the three contracts including extensions of time, and the Employer's right to suspend the works; testing on and after completion and the Employer's taking over of the works; defects after taking over, acceptance of the works and unfulfilled obligations; measurement (in the Red Book), the Contract Price and payment; the new variations regime and adjustments to the Price; termination and suspension; care of the works and indemnities and Exceptional Events (previously, Force Majeure). An important feature of the new contracts is their increased emphasis on clarity in the claims process and on dispute avoidance. These topics are examined in the final two chapters, 15 and 16, which deal respectively with the new claims and dispute resolution provisions of the 2017 forms. FIDIC contracts are the most widely used standard forms of contract for international engineering and construction projects; Provides a clear and comprehensive guide to the 2017 FIDIC Red, Yellow and Silver Books; Written by a senior specialist lawyer and member of the FIDIC 2017 Updates Task Group responsible for writing the new contracts; Accessible to those with little or no familiarity with FIDIC contracts. The 2017 FIDIC Contracts is an important guide for anyone engaged in international projects, including employers, contractors, engineers, lawyers, suppliers and project financiers/sponsors.
