

1. Record Nr.	UNINA9910830896903321
Titolo	Lignocellulose bioconversion through white biotechnology // edited by Anuj Kumar Chandel
Pubbl/distr/stampa	Hoboken, New Jersey ; ; Chichester, West Sussex, England : , : Wiley, , [2023] ©2023
ISBN	1-119-73598-X 1-119-73596-3
Descrizione fisica	1 online resource (429 pages)
Disciplina	662.88
Soggetti	Lignocellulose - Biotechnology Renewable natural resources Lignocellulose
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Cover -- Title Page -- Copyright Page -- Contents -- List of Contributors -- Preface -- Chapter 1 White Biotechnology: Impeccable Role in Sustainable Bioeconomy -- 1.1 Introduction -- 1.2 Biomass Feedstock: Types and Composition -- 1.3 Biomass Pretreatment: An Overview and State-of-the-Art -- 1.4 Lignocellulosic Sugar Production -- 1.5 Production of Ethanol and Biodiesel -- 1.6 Drop-in Renewable Biofuels: Green Hydrocarbons -- 1.7 Global Scenario of the Biofuel Industry -- 1.8 Economic Outcomes -- 1.9 Sustainability and Biorefinery -- 1.10 Conclusion -- Acknowledgement -- References -- Chapter 2 Lignocellulose Feedstock Availability, Types of Feedstocks, and New Designer Crops -- 2.1 Introduction -- 2.2 Lignocellulosic Biomass -- 2.2.1 Plant Cell Wall -- 2.3 Biomass Conversion Pathways -- 2.3.1 Lignocellulosic Biomass Pretreatment -- 2.3.2 Enzymatic Hydrolysis -- 2.3.3 Conversion of Lignocellulosic Components -- 2.4 Different Types of Biomass Available in Mexico -- 2.4.1 Coconut Shells -- 2.4.2 Sugarcane Bagasse -- 2.4.3 Tequilana Agave -- 2.5 Conclusion -- References -- Chapter 3 Lignocellulose Bioconversion: Technical Aspects and New Developments -- 3.1 Introduction -- 3.2 Lignocellulosic (LC) Biomass Composition -- 3.2.1

Cellulose -- 3.2.2 Hemicellulose -- 3.2.3 Lignin -- 3.3 Biorefinery
Concept in the Era of Sustainable Circular Economy -- 3.4 Biorefinery
Treatments -- 3.4.1 Pretreatments -- 3.5 New Innovative Technologies
and Developments -- 3.5.1 Development of Green/Environmentally
Friendly Methods -- 3.5.2 Biological New Developments -- 3.5.3
Combined Pretreatment Methods -- 3.6 Final Remarks -- References
-- Chapter 4 An Evaluation of Steam Explosion Pretreatment to
Enhance the Digestibility of Lignocellulosic Biomass -- 4.1 Introduction
-- 4.2 Mode of Action and Types of Steam Explosion Pretreatment.
4.3 Factors Affecting the Steam Explosion Pretreatment -- 4.3.1 Effect
on Particle Size of Biomass -- 4.3.2 Effect of Moisture Content -- 4.3.3
Effect of Combined Severity Factor -- 4.3.4 Effect of Addition
of Catalyst -- 4.4 Various Post-pretreatment Approaches to Improve
Saccharification of Steam Exploded Biomass -- 4.5 Summary
and Conclusions -- Acknowledgements -- References -- Chapter 5
The Role of Plant Cell Wall Degrading Enzymes in Biorefinery
Development -- 5.1 Introduction -- 5.2 Lignocellulosic Biomass-the
Plant Cell Wall -- 5.3 The Cell Wall Degrading Enzymes -- 5.4
Cellulases in a Biorefinery Development -- 5.4.1 Commercial Cellulase
Cocktails for Lignocellulosic Biomass Degradation -- 5.4.2 Commercial
Cellulase Preparation for Various Industrial Uses -- 5.5 Microbial
Fermentations for Cellulase Production -- 5.6 Conclusion --
Acknowledgement -- References -- Chapter 6 Microbial Production of
Biobased Chemicals: Improvements and Challenges -- 6.1 Introduction
-- 6.2 Challenges in Developing Microorganisms for Lignocellulosic
Sugar Utilization -- 6.3 Relevant Biobased Chemicals from Biomass --
6.4 Microbial Products from Sugar Fermentation -- 6.4.1 Organic Acids
-- 6.4.2 Diols -- 6.4.3 Polyols -- 6.4.4 Alcohols -- 6.4.5 Aldehydes --
6.4.6 Polyesters -- 6.4.7 Xylenes -- 6.5 Conclusion -- References --
Chapter 7 Molecular Biology Based Innovations in Lignocellulose
Biorefinery -- 7.1 Introduction -- 7.2 Lignocellulosic Biomass Potential
-- 7.3 Biomass Pretreatment -- 7.3.1 Mechanical Pretreatment -- 7.3.2
Chemical Pretreatment -- 7.3.3 Biological Pretreatment -- 7.3.4 Other
Methods -- 7.4 Different Approaches to Enhance Xylose Utilization --
7.4.1 Random Mutagenesis -- 7.4.2 Site-specific Engineering -- 7.5
Conclusion and Future Prospects -- References.
Chapter 8 Recent Developments in Synthetic Biology and their Role in
Uplifting Lignocellulose Bioeconomy -- 8.1 Introduction -- 8.1.1
Synthetic Biology Routes for the Delignification of Lignocellulosic
Biomass for Biorefinery -- 8.1.2 The Key Players of Delignification --
8.1.3 Case Studies -- 8.2 Synthetic Biology Routes for Cellulose
Degradation in Lignocellulosic Biomass -- 8.2.1 Cellulose-a Major Plant
Component -- 8.2.2 Synthetic Biology for Hydrolysis of Cellulose --
8.2.3 Degradation using Nanoparticles -- 8.3 Synthetic Biology Routes
for the Production of Low-value and High-value Alcohols -- 8.3.1 Low-
value Alcohols -- 8.3.2 High-value Alcohols -- 8.4 Conclusion --
References -- Chapter 9 Lignocellulose Bioconversion through
Chemical Methods, Platform Chemicals, and New Chemicals -- 9.1
Introduction -- 9.2 Lignocellulosic Biomass -- 9.2.1 Chemical
Composition of Lignocellulosic Biomass -- 9.2.2 Biomass Types
and Recalcitrance Properties -- 9.3 Pretreatment and Fractionation
of Lignocellulosic Materials -- 9.3.1 Chemical Pretreatments -- 9.3.2
Physicochemical Pretreatment -- 9.3.3 Fractionating Treatments
of Lignocellulosic Compounds -- 9.4 Enzymatic Hydrolysis
of Lignocellulosic Biomass -- 9.4.1 Cellulases -- 9.4.2 Ligninolytic
Enzymes -- 9.4.3 Pectic Enzymes -- 9.4.4 Mannases -- 9.4.5
Xylanases -- 9.4.6 Enzyme Synergism -- 9.5 Biorefinery-Biobased
Chemicals Platform -- 9.5.1 Contextualization-Bioeconomic

and Biorefinery -- 9.5.2 Bioethanol -- 9.5.3 Other Value-added Bioproducts Obtained from Lignocellulosic Biomass -- 9.5.3.4 Sweeteners -- Acknowledgment -- References -- Chapter 10 Lignin Conversion through Biological and Chemical Routes -- 10.1 Introduction -- 10.1.1 Lignin Availability -- 10.1.2 Lignin Structure -- 10.1.3 Chemical Transformation Routes -- 10.1.4 Lignin Conversion by Biological Routes. 10.1.5 Potential Chemicals from Lignin -- 10.2 Conclusions -- Acknowledgements -- References -- Chapter 11 Downstream Processing in Lignocellulose Conversion: Current Challenges and Future Practices -- 11.1 Introduction -- 11.2 Challenges and Perspectives Encompassing Circular Economy -- 11.3 Improving Lignocellulose Conversion for Future Bioeconomy -- 11.4 Industry 4.0: Advanced Technologies for the Biorefinery Platform -- 11.5 Conclusions -- References -- Chapter 12 Scale-up Process Challenges in Lignocellulosic Biomass Conversion and Possible Solutions to Overcome the Hurdles -- 12.1 Introduction -- 12.2 Lignocellulosic Conversion Processes and Engineering: Challenges and Possible Solutions -- 12.2.1 Steam Pretreatment: Issues and Potential Problems -- 12.3 Ethanol from Eucalyptus Wastes -- 12.4 Ethanol and Xylitol Production from Sprinkled Sugarcane Straw -- 12.5 Conclusions and Remarks -- References -- Chapter 13 Techno-economic Analysis of Bioconversion of Woody Biomass to Ethanol -- 13.1 Introduction -- 13.2 Techno-economic Analysis -- 13.3 Bioconversion of Woody Biomass to Ethanol -- 13.4 Techno-economic Analysis of Woody Biomass to Ethanol -- 13.5 Integrated TEA and life cycle assessment (LCA) -- 13.6 Conclusions -- References -- Chapter 14 Environmental Indicators, Life Cycle Analysis and Ecological Perspective on Biomass Conversion -- 14.1 Introduction -- 14.1.1 The Role of Biomass in a Sustainable Economy -- 14.2 Life Cycle Assessment (LCA) -- 14.3 New Brazilian National Biofuel Policy (RenovaBio): A Case Study for Sugarcane Distilleries -- 14.4 Process Systems Engineering Tools for Biomass LCA -- 14.5 Retro Techno-economic Environmental Analysis -- Acknowledgements -- References -- Chapter 15 Green Consumerism and Role in Uplifting Lignocellulose Bioeconomy -- 15.1 Introduction. 15.2 Lignocellulosic Biomass and its Contribution in Bioeconomy -- 15.2.1 Lignocellulosic Biomass -- 15.2.2 Life Cycle Assessment (LCA) of Lignocellulosic Biomass -- 15.3 Lignocellulosic Bioeconomy and its Sustainability in the World -- 15.3.1 Lignocellulose Bioeconomy in Malaysia -- 15.3.2 Lignocellulose Bioeconomy in Japan -- 15.3.3 Lignocellulose Bioeconomy in European Countries -- 15.4 Green Consumerism and its Upsurge in the Lignocellulosic Bioeconomy -- 15.4.1 Wide Scope in Green Consumerism -- 15.4.2 Government Subsidies -- 15.4.3 Eco-friendly Competitive Advantage -- 15.4.4 Corporate Social Responsibility -- 15.5 Challenges in Green Consumerism -- 15.6 Future Prospects -- 15.7 Conclusion -- References -- Chapter 16 Going Green: Achieving the Circular Economy with Sustainable Biorefineries, Process Scale-Up, and Fermentation Optimization -- 16.1 Introduction -- 16.2 Sustainable Biorefineries and Supply Chain Aspects -- 16.3 Pretreatment of Biomass Using Pilot-Scale Steam Explosion Rigs -- 16.3.1 Steam Explosion (SE) of Miscanthus and Methane Production from Miscanthus as an Example -- 16.3.2 Heat Requirement of Biorefineries -- 16.4 Taguchi Methodology for Process Optimization -- 16.5 Process Automation -- 16.5.1 Automation -- 16.5.2 Process Optimization and Artificial Intelligence -- 16.5.3 Biogas Pilot Plant -- 16.5.4 Sensors -- 16.5.5 Process Control Configuration with LabVIEW and NI Data Acquisition (DAQ) Devices -- 16.5.6 Rule-based Control Structure -- 16.5.7 Pilot Plant

Data -- 16.5.8 LabVIEW Application for Laboratory-scale, Pilot-scale and Industrial Fermentations -- 16.5.9 Advantages of LabVIEW in Automation and Monitoring Commercial Plants -- 16.6 Microbial Adaptation, Evolution, and Diversity for Process Optimization -- 16.6.1 Microbiology of Volatile Fatty Acids (VFAs) Production in AD -- 16.7 Final Remarks and Conclusions.
16.7.1 Main Conclusions.
