

1. Record Nr.	UNINA9910830901603321
Autore	Janier Mathilde
Titolo	Argument mining : linguistic foundations // Mathilde Janier, Patrick Saint-Dizier
Pubbl/distr/stampa	London, England ; ; Hoboken, New Jersey : , : Iste : , : Wiley, , [2019] ©2019
ISBN	1-119-67104-3 1-119-67116-7 1-119-50729-4
Edizione	[1st edition]
Descrizione fisica	1 online resource (207 pages)
Disciplina	025.524
Soggetti	Information retrieval Natural language processing (Computer science)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This book is an introduction to the linguistic concepts of argumentation relevant for argument mining, an important research and development activity which can be viewed as a highly complex form of information retrieval, requiring high-level natural language processing technology. While the first four chapters develop the linguistic and conceptual aspects of argument expression, the last four are devoted to their application to argument mining. These chapters investigate the facets of argument annotation, as well as argument mining system architectures and evaluation. How annotations may be used to develop linguistic data and how to train learning algorithms is outlined. A simple implementation is then proposed. The book ends with an analysis of non-verbal argumentative discourse. Argument Mining is an introductory book for engineers or students of linguistics, artificial intelligence and natural language processing. Most, if not all, the concepts of argumentation crucial for argument mining are carefully introduced and illustrated in a simple manner.
