

1. Record Nr.	UNINA9910830932603321
Titolo	Hybrid nanomaterials [[electronic resource]] : synthesis, characterization, and applications / / edited by Bhanu P.S. Chauhan
Pubbl/distr/stampa	Hoboken, N.J., : Wiley, c2011
ISBN	1-283-23967-1 9786613239679 1-118-00348-9 1-118-00349-7 1-118-00347-0
Descrizione fisica	1 online resource (348 p.)
Classificazione	TEC021000
Altri autori (Persone)	ChauhanBhanu P. S
Disciplina	620.1/15 620.115
Soggetti	Nanostructured materials
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Hybrid Nanomaterials: Synthesis, Characterization, and Applications; CONTENTS; PREFACE; CONTRIBUTORS; 1 Hybrids from Polymer Colloids and Metallic Nanoparticles: A Novel Type of "Green" Catalyst; 2 Metal and Metal Oxide Nanostructure on Resin Support; 3 Pd-Nanoparticle Catalyzed Poly(hydro)siloxane Grafting: A Selective and Efficient Approach to Organic/Inorganic Hybrid Polymers; 4 Design and Synthesis of Nanohybrid Systems Based on Silicon-Oxygen Bond; 5 Nanocrystalline Magnesium Oxide for Asymmetric Organic Reactions 6 Boron-Based Hybrid Nanostructures: Novel Applications of Modern Materials7 The Exploration of Biomedical Multimodality in Small Solid Core Nanoparticles; 8 A Survey Study of Interactions of Gold Nanoparticles with Common Human Blood Plasma Proteins; 9 Genetically Modified Collagen-like Triple Helix Peptide as Biomimetic Template; 10 Polydiacetylene-Containing Liposomes as Sensory Materials; 11 Block-Copolymer-Templated Synthesis of Ordered Silicas with Closed Mesopores 12 Organic-Inorganic Hybrid Nanomaterials: Organization, Functionalization, and Potential Applications in Environmental

Sommario/riassunto

"Hybrid nanomaterials are unique conjugates of organic/inorganic structures. Hybrid Nanomaterials: Synthesis, Characterization, and Applications presents the basic principles underlying the synthesis and fabrication of nanohybrids, their benefits, self-assembly and fabrication, and applications. This book discusses the most recent developments pertaining to the synthesis, characterizations, and applications of hybrid nanomaterials in a format that various disciplines can understand and use. Written by experts in this field, the text provides a fundamental insight into tricks, tools, and challenges associated with these technique or technology for engineers and scientists"--
