| Sommario/riassunto | This volume provides a comprehensive and balanced survey of the state of American public education. It examines the trend in the quality of the public schools over the past 100 years, and reviews the possible reasons for a decline in quality. The work focuses on the importance of local control in American public education and how it has been steadily eroded. Franciosi advocates school choice as a way of restoring greater control by parents over their children's schools. This work is distinct among calls of reform in that it takes a skeptical attitude towards the centralized school reform movem |

Sommario/riassunto

Featuring the work of an international group of scholars, this volume covers the transport properties and Soliton models of Polyacetylene, development and application of the theory of Brownian Motion, the fading of memory during the regression of structural fluctuations, the breakdown of the Kramers Theory as a problem of correct modeling, and more.
