

1. Record Nr.	UNINA9910830970003321
Autore	Malkin Aleksandr IAKovlevich
Titolo	Rheokinetics [[electronic resource]] : rheological transformations in synthesis and reactions of oligomers and polymers / / A. Ya. Malkin and S.G. Kulichikhin
Pubbl/distr/stampa	Zug ; ; Oxford, Conn., : Huthig & Wepf, c1996
ISBN	1-281-84265-6 9786611842659 3-527-61495-8 3-527-61494-X
Descrizione fisica	1 online resource (328 p.)
Altri autori (Persone)	KulichikhinS. G (Sergei Grigorevich)
Disciplina	0068.9
Soggetti	Polymers - Rheology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Rheological Transformations in Synthesis and Reactions of Oligomers and Polymers; Table of Contents; Chapter 1 Introduction; 1.1 References for Chapter 1; Chapter 2 Rheokinetics of Linear Polymer Formation; 2.1 General; 2.2 Ionic Polymerization; 2.2.1 A Direct Rheokinetic Problem; 2.2.2 Anionic Polymerization with Varying Amounts of Active Centres; 2.2.3 An Inverse Kinetic Problem; 2.2.4 Experimental Methods; 2.2.5 Anionic Polymerization of Dodecalactam; 2.2.6 Increase of Viscosity during Anionic Polymerization with Changing Concentration of Active Centres 2.2.7 Anionic Polymerization of ε-caprolactam2.2.8 References for Section 2.2; 2.3 Free Radical Polymerization; 2.3.1 Rheokinetics of the Process - Theoretical Considerations; 2.3.2 Steady Stage of Polymerization - Experimental; 2.3.3 Viscosity of the Medium - Its Role; 2.3.4 Gel Effect; 2.3.5 Polymerization in Heterogeneous Medium; 2.3.6 References for Section 2.3; 2.4 Polycondensation; 2.4.1 Introduction; 2.4.2 Rheokinetic Pattern of the Process; 2.4.3 Experimental; 2.4.4 References for Section 2.4; Chapter 3 Rheokinetics of Oligomer Curing; 3.1 General principles 3.1.1 References for Section 3.13.2 Determination of the Point of Gel Formation; 3.2.1 References for Section 3.2; 3.3 Viscosity Increase to

the Point of Gel Formation; 3.3.1 References for Section 3.3; 3.4
 Microphase Separation in Reactive Systems; 3.4.1 References for
 Section 3.4; 3.5 Curing After the Point of Gel Formation; 3.5.1
 References for Section 3.5; 3.6 Rheokinetic Equations of Curing; 3.6.1
 References for Section 3.6; 3.7 Non-isothermal Curing; 3.7.1 Causes of
 Non-isothermal Behaviour; 3.7.2 Determination of Kinetic Constants in
 an Adiabatic Process
 3.7.3 Non-isothermal Curing - Calculations 3.7.4 Heat Transfer from an
 External Source (Linear Temperature Increase); 3.7.5 Curing at High
 Shear Rates; 3.7.6 References for Section 3.7; 3.8 Structuring
 Peculiarities of Different Forms of Oligomers and Polymers; 3.8.1
 Curing Phenolformaldehyde Resins and Related Oligomers; 3.8.2
 Production of Polyurethanes; 3.8.3 The Curing of Unsaturated
 Polyesters; 3.8.4 Silico-organic Polymers; 3.8.5 Amino-formaldehyde
 Resins; 3.8.6 Epoxy silico-organic Oligomers; 3.8.7 Rubber
 Compositions; 3.8.8 Thermo-reactive Polyamides; 3.8.9 Epoxy
 Oligomers
 3.8.10 References for Section 3.8 Chapter 4 Transformation in
 Polymeric Systems; 4.1 Polymer-analogous Transformations; 4.1.1
 Transformations in the Solid Phase; 4.1.2 Photo-viscous Effect; 4.1.3
 References for Section 4.1; 4.2 Gelation (Curing in Solution); 4.2.1
 General Remarks; 4.2.2 Antithixotropy During Gel Formation; 4.2.3 The
 Role of the Solvent; 4.2.4 Gelation Kinetics; 4.2.5 Gelation of Plasticsols;
 4.2.6 References for Section 4.2; 4.3 Rheology of Phase Transitions;
 4.3.1 Plotting Phase Diagrams; 4.3.2 Crystallization; 4.3.3 Phase
 Transformations in Reactive Systems
 4.3.4 References for Section 4.3
