

1. Record Nr.	UNINA9910830989003321
Autore	Bohrer Denise
Titolo	Sources of contamination in medicinal products and medical devices [[electronic resource] /] / Denise Bohrer
Pubbl/distr/stampa	Hoboken, N.J., : Wiley, 2012
ISBN	1-118-44905-3 1-283-64526-2 1-118-44906-1 1-118-44908-8
Descrizione fisica	1 online resource (593 p.)
Disciplina	338.4/76151 338.476151
Soggetti	Microbial contamination Pharmaceutical industry - Quality control Pharmaceutical technology - Standards
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Title page; Copyright page; Contents; Preface; Acknowledgments; 1: Introduction; Reference; 2: Directives for Contamination Control; PART I: Chemical Contamination; 3: Raw Materials; 3.1 Water; 3.2 Inorganic Impurities; 3.3 Organic Impurities; 3.3.1 By-products; 3.3.2 Genotoxic Impurities (GTIs); 3.3.3 Degradation Products; 3.4 Additives; 3.5 Residual Solvents; Concluding Remarks; References; 4: Medicinal Gases and Volatile Anesthetics; 4.1 Medicinal Gases; 4.2 Volatile Anesthetics; Concluding Remarks; References; 5: Diagnostic Imaging Agents; 5.1 Radiopharmaceuticals 5.1.1 Technetium-Based Products 5.1.2 Iodine-Based Products; 5.1.3 Fluorine-Based Products; 5.2 Contrast Agents; 5.2.1 Gadolinium-Based Products; 5.2.2 Iodine-Based Products; 5.2.3 Barium Sulfate; Concluding Remarks; References; 6: Containers; 6.1 Glass Containers; 6.2 Plastic Containers; 6.2.1 Polymer Formation; 6.2.2 PVC Containers; 6.2.3 Other Plastic Containers; 6.3 Metal Containers; Concluding Remarks; References; 7: Closures; Concluding Remarks; References; 8: Delivery Systems and Filters; 8.1 Delivery Systems Made of PVC; 8.2

Delivery Systems Made of Other Plastic Materials; 8.3 Filters  
Concluding RemarksReferences; 9: Medical Devices; 9.1 General Use  
Devices; 9.1.1 Medical Gloves; 9.1.2 Syringes; 9.2 Extracorporeal  
Circuits; 9.3 Devices for Administration of Aerosolized Drugs; 9.4  
Reprocessed Medical Devices; 9.5 Tissue Substitutes; 9.5.1 Skin  
Substitutes and Surgical Dressings; 9.5.2 Hard Tissue Substitutes; 9.5.3  
Soft Tissue Substitutes; Concluding Remarks; References; PART II:  
Physical Contamination; 10: Particulate Matter; Concluding Remarks;  
References; PART III: Microbiological Contamination; 11:  
Microbiological and Endotoxin Contamination; 11.1 Water  
11.2 Raw Materials11.3 Sterile Products; 11.3.1 Single- and Multiple-  
Dose Products; 11.3.2 Parenteral Nutrition (PN); 11.3.3 Propofol; 11.3.4  
Ophthalmic Products; 11.4 Medicinal Gases; 11.5 Medical Devices;  
11.5.1 Syringes; 11.5.2 Endoscopes; 11.5.3 Other Devices; 11.6  
Biofilms; 11.7 Dialysis Circuits; 11.8 Nosocomial Infections; Concluding  
Remarks; References; PART IV: Miscellaneous; 12: Contamination from  
Sterilization Procedures; 12.1 Residuals from Radiation Sterilization;  
12.1.1 Radiolysis of Water; 12.1.2 Effect of Ionizing Radiation on Drug  
Products; 12.1.3 Polymers in Drug Delivery  
12.1.4 Radiolysis of Selected Nondrug Components12.1.5 Effect of  
Ionizing Radiation on Materials Used in Packaging and in Medical  
Devices; 12.2 Heat Sterilization; 12.3 Residuals from Chemical  
Disinfection and Sterilization Agents; 12.3.1 Ethylene Oxide (EtO);  
12.3.2 Peracetic Acid and Hydrogen Peroxide; 12.3.3 Formaldehyde;  
Concluding Remarks; References; 13: Biotechnological Products; 13.1  
DNA and HCP Residuals; 13.2 Viruses and Mycoplasma; 13.3  
Endotoxin; 13.4 Protein Degradation; 13.5 Protein Aggregation;  
Concluding Remarks; References  
Appendix Polymeric Materials: Components, Additives, Extractables,  
and Degradation Products

---

### Sommario/riassunto

The first one-volume guide to sources of contamination in pharmaceuticals and medical devices. Most books dealing with contaminants in medicinal products often focus on analytical methods for detecting nonspecific impurities. Key to the work of the pharmaceutical chemist, this unique reference helps identify the sources of contamination in medicinal and pharmaceutical products and medical devices. Divided into three parts, Sources of Contamination in Medicinal Products and Medical Devices covers chemical, microbiological, and physical (particulate matter) contamination, i
