

1. Record Nr.	UNINA9910830995003321
Autore	Huynh-Ba Kim
Titolo	Analytical chemistry : an introduction to pharmaceutical GMP laboratory // Kim Huynh-Ba
Pubbl/distr/stampa	Hoboken, New Jersey : , : Wiley, , [2022] ©2022
ISBN	1-119-68047-6 1-119-68046-8
Descrizione fisica	1 online resource (419 pages)
Disciplina	615.19
Soggetti	Pharmaceutical industry - Quality control Analytical chemistry Drugs - Testing
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Cover -- Title Page -- Copyright Page -- Contents -- Einstein Quotation -- Preface -- About the Editor -- Biographies of Contributing Authors -- Editorial Notes -- Acknowledgments -- Chapter 1 Drug Regulations and the Pharmaceutical Laboratories -- 1.1 Introduction -- 1.2 Food and Drug Administration: Roles and Its Regulations -- 1.2.1 Code of Federation Regulations -- 1.2.2 FDA Guidance Documents -- 1.2.3 FDA Manual of Policies and Procedures -- 1.3 International Council for Harmonisation of Technical Requirements for Pharmaceuticals for Human Use (ICH) and Its Role -- 1.3.1 ICH Background -- 1.3.2 ICH Structure -- 1.3.3 ICH Organization -- 1.3.4 ICH Topics -- 1.4 Pharmaceutical Analysis -- 1.4.1 Analytical Testing -- 1.4.2 Interaction of the Analytical Development Department and Other Functional Areas -- 1.4.3 Drug Development Process -- 1.5 Summary -- List of Abbreviations -- References -- Chapter 2 Good Manufacturing Practices (GMPs) and the Quality Systems -- 2.1 Introduction to Good Manufacturing Practices -- 2.2 Objectives of GMPs -- 2.2.1 Definitions -- 2.2.2 Organization of 21 CFR Regulations -- 2.3 Personnel Qualification and Responsibilities - Subpart B -- 2.3.1 Responsibilities of the Quality Control Unit -- 2.3.2 Personnel

Qualifications and Responsibilities -- 2.4 Equipment - Subpart D --  
2.4.1 Metrology Functions -- 2.4.2 Qualification Phases -- 2.5  
Laboratory Controls -- 2.5.1 General Requirements -- 2.5.2 Testing  
and Release for Distribution -- 2.5.3 Stability Program -- 2.5.4  
Retention Program -- 2.6 Records and Reports -- 2.7 Pharmaceutical  
Quality -- 2.7.1 Quality Manual -- 2.7.2 Quality Risk Management --  
2.7.3 Product Quality Review -- 2.7.4 Pharmaceutical Quality Systems  
-- List of Abbreviations -- References -- Chapter 3 Analytical  
Techniques Used in the GMP Laboratory -- 3.1 Introduction -- 3.2  
Definitions.  
3.2.1 Raw Data and Analytical Data -- 3.2.2 Analyses -- 3.2.3  
Analytical Documents -- 3.3 Basic Laboratory Procedures -- 3.3.1  
Balances -- 3.3.2 Volumetric Glassware -- 3.3.3 Potentiometry (Ion-  
Selective Electrode) and pH Test -- 3.3.4 The Density Test -- 3.3.5 The  
Friability Test -- 3.3.6 The Hardness Test -- 3.3.7 The Titration Test  
-- 3.3.8 The Karl Fischer Titration-Water Determination -- 3.3.9 Loss  
on Drying -- 3.3.10 Residue on Ignition/Sulfated Ash -- 3.3.11  
Thermo Gravimetric Analysis -- 3.3.12 Differential Scanning  
Calorimetry -- 3.3.13 The Disintegration Test -- 3.3.14 Particulate  
Matter -- 3.3.15 Osmolality -- 3.4 Chromatography -- 3.4.1 High-  
Performance Liquid Chromatography -- 3.4.2 Ultra-High-Pressure  
Liquid Chromatography -- 3.4.3 Detectors of Liquid Chromatography  
-- 3.4.4 System Suitability Tests for Chromatographic Methods --  
3.4.5 Maintenance of HPLC and UHPLC -- 3.4.6 Gas Chromatography  
-- 3.4.7 Thin-Layer Chromatography -- 3.4.8 Bio-Pharmaceutical  
Separations -- 3.5 Spectroscopic Sciences -- 3.5.1 Ultraviolet-Visible  
-- 3.5.2 Infrared-Absorption -- 3.5.3 Mass Spectroscopy -- 3.5.4  
Atomic Absorption, Inductively Coupled Plasma, Inductively Coupled  
Plasma/Mass Spectrometry, and Inductively Coupled Plasma/Optical  
Emission Spectrometry -- 3.5.5 Nuclear Magnetic Resonance  
Spectroscopy -- 3.5.6 X-ray Absorption and X-ray Emission  
Spectrometry -- 3.6 Uniformity of Dosage Units -- 3.6.1 Weight  
Variation -- 3.6.2 Acceptance Criteria per USP &lt; 905&gt; -- -- 3.7  
Elemental Analysis -- 3.8 Appearance -- 3.9 Visual Inspection -- 3.10  
Microbiological Testing -- 3.10.1 Microbial Limits -- 3.10.2 Sterility --  
3.10.3 Bacterial Endotoxins -- 3.10.4 Antimicrobial Effectiveness  
Testing -- 3.11 Summary -- References -- Chapter 4 Control  
Strategies for Pharmaceutical Development -- 4.1 Introduction -- 4.2  
Quality-by-Design Concept.  
4.3 Risk Management -- 4.3.1 Risk Assessment -- 4.3.2 Risk Control  
-- 4.4 Establishing Specifications -- 4.4.1 What Is the Specification? --  
4.4.2 Typical Tests Included in the Specification of a Small Molecule  
Drug -- 4.4.3 Typical Tests Included in the Specification of Biological  
Drugs -- 4.4.4 Considerations of Setting Acceptance Criteria -- 4.5  
Design of Experiments -- 4.5.1 Common Terms -- 4.5.2 Conducting  
the Study -- 4.5.3 Results Interpretation -- 4.5.4 Summary -- 4.6  
Common Statistical Analysis -- 4.6.1 Mean, Standard Deviation (SD),  
and Relative Standard Deviation (RSD) -- 4.6.2 Confidence Interval --  
4.6.3 Statistical Significance (t-Test) -- 4.6.4 Outlier Detection -- 4.7  
Summary -- List of Abbreviations -- References -- Chapter 5  
Development and Validation of Analytical Procedures -- 5.1  
Introduction -- 5.2 Method Development -- 5.2.1 Development  
of Physical, Chemical, and Microbiological Procedures -- 5.3  
Qualification, Validation, and Verification -- 5.3.1 Qualification --  
5.3.2 Validation -- 5.3.3 Verification -- 5.3.4 Frequency of Study --  
5.4 Validation Parameters -- 5.4.1 Accuracy -- 5.4.2 Precision -- 5.4.3  
Specificity -- 5.4.4 Quantitation and Detection Limits (QL and DL) --  
5.4.5 Linearity -- 5.4.6 Range -- 5.4.7 Robustness -- 5.4.8 System

Suitability Tests (SST) -- 5.4.9 Stability of Samples During Analysis -- 5.4.10 Tie the Pieces Together -- 5.5 Validation for Physical, Chemical, Biotechnological, and Microbiological Procedures -- 5.6 Validation of In-process, Environmental, Release, and Stability Procedures -- 5.6.1 In-process Procedures -- 5.6.2 Environmental Procedures -- 5.6.3 Release and Stability Procedures -- 5.7 Other Procedures -- 5.7.1 Process Analytical Technology (PAT) -- 5.7.2 Parametric Release and Real-time Release -- 5.8 Validation of Procedures in Continuous and Batch Manufacturing -- 5.9 Summary.

List of Abbreviations -- References -- Chapter 6 Transfer of Analytical Procedures -- 6.1 Introduction -- 6.2 Purpose of Method Transfer -- 6.3 Transfer Options -- 6.3.1 Method Transfer Plan -- 6.3.2 Comparative Testing -- 6.3.3 Co-validation -- 6.3.4 Extended Validation or Partial Validation -- 6.3.5 Transfer Waiver -- 6.4 Method Transfer Process -- 6.4.1 Preparation Phase -- 6.4.2 Gap Analysis -- 6.4.3 Method Training Phase -- 6.4.4 Method Qualification Phase -- 6.5 Transfer Protocol -- 6.5.1 Content of a Transfer Protocol -- 6.5.2 Objectives/Scope -- 6.5.3 Roles and Responsibilities -- 6.5.4 Assessment of Receiving Lab -- 6.5.5 Materials, Facilities, and Instrumentation -- 6.5.6 Analyst Training -- 6.5.7 Qualification Procedure -- 6.5.8 Acceptance Criteria -- 6.5.9 Protocol Amendment and Deviation -- 6.6 Method Transfer Report -- 6.6.1 Objectives -- 6.6.2 Data Evaluation -- 6.6.3 Conclusion of Transfer Report -- 6.6.4 Analytical Transfer File -- 6.7 Related Documents -- 6.8 Handling Transfer Failures -- 6.9 Transfer to a Contract Lab -- 6.10 Transfer to an International Site -- 6.11 Summary -- References -- Chapter 7 Dissolution Testing in the Pharmaceutical Laboratory -- 7.1 Introduction -- 7.2 Regulatory and Compendial Role in Dissolution Testing -- 7.3 Theory -- 7.4 Equipment Operation and Sources of Error -- 7.4.1 Equipment Variables -- 7.4.2 Media Deaeration -- 7.4.3 Vibration -- 7.4.4 Water Bath of Dissolution Equipment -- 7.4.5 Glass Vessels -- 7.5 Common Errors of Dissolution Apparatus -- 7.5.1 USP Apparatus 1 and 2 -- 7.5.2 USP Apparatus 3 -- 7.5.3 USP Apparatus 4 -- 7.5.4 USP Apparatus 5 -- 7.5.5 USP Apparatus 6 -- 7.5.6 USP Apparatus 7 -- 7.6 Dissolution Method Considerations -- 7.6.1 Sample Introduction -- 7.6.2 Media Attributes -- 7.6.3 Observations -- 7.6.4 Sinkers -- 7.6.5 Filters -- 7.6.6 Manual Sampling. 7.6.7 Automation of Dissolution Sampling -- 7.6.8 Cleaning of Dissolution Equipment -- 7.7 Method Development -- 7.7.1 Drug Properties -- 7.7.2 Dosage Form Properties -- 7.7.3 Dissolution Profile -- 7.7.4 Dissolution Media -- 7.7.5 Medium Volume -- 7.7.6 Deaeration -- 7.7.7 Speed -- 7.7.8 Sinkers -- 7.7.9 Filtration -- 7.7.10 Time Points - Immediate Release -- 7.7.11 Fast Stir or Infinity Point -- 7.7.12 Time Points for Extended-Release Products -- 7.8 Poorly Soluble Drugs -- 7.8.1 Sink Conditions -- 7.8.2 Apparatus Selection -- 7.8.3 The Discriminatory Power of the Method -- 7.9 Setting Specifications -- 7.10 Harmonization -- 7.11 Method Validation -- 7.12 Validation of Product Performance Parameters -- 7.12.1 Accuracy/Recovery -- 7.12.2 Selectivity -- 7.12.3 Solution Stability -- 7.12.4 Filter -- 7.12.5 Robustness -- 7.12.6 Intermediate Precision -- 7.12.7 Automated Methodology -- 7.13 Validation of the Analytical Finish -- 7.14 Method Transfer Considerations -- 7.14.1 Robustness -- 7.14.2 Details of the Analytical Method -- 7.14.3 Other Considerations -- 7.15 Good Manufacturing Practices (GMP) in the Dissolution Testing Laboratory -- 7.15.1 Metrology -- 7.15.2 Notebook Documentation -- 7.15.3 Equipment Qualification, Validation, and Method Critical Factors -- 7.15.4 Good Manufacturing Practice Audits -- 7.15.5 Training -- 7.16 Summary --

Acknowledgment -- List of Abbreviations -- Chapter 8 Analytical Data and the Documentation System -- 8.1 Introduction -- 8.1.1 Types of Documents -- 8.2 GMP for Records and Reports-Subpart J -- 8.2.1 General Requirements -- 8.2.2 Equipment Cleaning and Use Log -- 8.2.3 Component, Drug Product Container, Closure, and Labeling Records -- 8.2.4 Master Production and Control Records -- 8.2.5 Batch Production and Control Records -- 8.2.6 Production Record Review -- 8.2.7 Laboratory Records -- 8.3 Keeping Good Records. 8.3.1 Writing Good Procedures.
