   Pubbl/distr/stampa Cham : , : Springer Nature Switzerland : , : Imprint : Springer, , 2024

   ISBN   3-031-50681-2

   Edizione   [1st ed. 2024.]

   Descrizione fisica 1 online resource (121 pages)

   Collana   SpringerBriefs in Computer Science, , 2191-5776

   Disciplina   005.1

   Soggetti   Software engineering
                      Computer programming
                      Software Engineering
                      Programming Techniques

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico   Monografia

   Nota di bibliografia   Includes bibliographical references.

   Nota di contenuto Preface -- 1 Introduction to Exception Handling -- 2 Basics of
                      Exception Handling -- 3 Exception Handling Best Practices -- 4
                      Advanced Exception Handling Techniques -- 5 Exception Handling in
                      Real-Time and Embedded Systems.

   Sommario/riassunto This book presents the fundamentals of exception handling with
                      examples written in C++ and Python. Starting with its history and
                      evolution, it explores the many facets of exception handling, such as its
                      syntax, semantics, challenges, best practices, and implementation
                      patterns. The book is composed of five chapters: Chapter 1 provides an
                      introduction, covering the history, various definitions, and challenges
                      of exception handling. Chapter 2 then delves into the basics, offering
                      insights into the foundational concepts and techniques. Subsequently,
                      chapter 3 touches upon the best practices for exception handling,
                      including the differences between errors and exceptions, the use of
                      assertions, and how to provide meaningful error messages. Chapter 4
                      takes a deep dive into advanced exception-handling techniques,
                      exploring e.g. patterns, guard clauses, and hierarchical exception
                      handling. Eventually, chapter 5 focuses on the complexities of
                      exception handling in real-time and embedded systems. This book is
                      mainly written for both students and professionals. Its readers will

understand the nuances between syntax and semantic errors, learn how to employ try-catch blocks effectively, grasp the importance of logging exceptions, and delve into advanced exception-handling techniques. This way, they will be enabled to handle exceptions effectively and thus write more robust, reliable, and resilient code.

2.	Record Nr.	UNINA9910960037603321
	Titolo	Sport, Rhetoric, and Gender : Historical Perspectives and Media Representations / / by L. Fuller
