

1. Record Nr.	UNINA9910831020203321
Autore	Auer Michael E
Titolo	Towards a Hybrid, Flexible and Socially Engaged Higher Education : Proceedings of the 26th International Conference on Interactive Collaborative Learning (ICL2023), Volume 3
Pubbl/distr/stampa	Cham : , : Springer International Publishing AG, , 2024 ©2024
ISBN	3-031-53022-5
Edizione	[1st ed.]
Descrizione fisica	1 online resource (531 pages)
Collana	Lecture Notes in Networks and Systems Series ; ; v.901
Altri autori (Persone)	CukiermanUriel R Vendrell VidalEduardo Tovar CaroEdmundo
Disciplina	378.17
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Preface -- Committees -- Contents -- Engineering Pedagogy Education -- Determinants for the Formation of a Fractality-Based Educational Environment in Engineering Pedagogical Education -- 1 Problem Statement -- 2 Analysis of Recent Research and Publications -- 3 Statement of Basic Material and the Substantiation of the Obtained Results -- 4 Conclusions -- References -- Systems Thinking Among Engineering Students -- 1 Introduction -- 2 Theoretical Background -- 3 Research Objective and Questions -- 4 Methodology -- 4.1 Participants -- 4.2 Procedure -- 4.3 Instruments -- 5 Findings -- 6 Discussion and Conclusion -- References -- How to Accompany the First-Year Student in Massified Higher Education? the Example of a Semester to Bounce Back -- 1 The Context -- 2 Supporting Self- questioning Students -- 3 A Space for Remotivation at University -- 4 Recruitment and Characteristics of Enrolled Students -- 5 A Space to Rethink a Professional or Study Plan -- 6 Conclusions -- References -- Developing Pedagogical Content Tasks in Research Methods Training of Future Vocational Teachers -- 1 Introduction -- 2 Literature Review -- 3 Statement of Basic Material and the Substantiation of the Obtained Results -- 4 Conclusions -- References -- A Qualitative Assessment of ChatGPT Generated Code in the Computer

Science Curriculum -- 1 Introduction -- 2 Background -- 3 Code Examples -- 3.1 Early Learners -- 3.2 Advanced Students -- 3.3 Additional Programs -- 4 Observations -- 5 Conclusion -- References -- Design and Implementation of the Integrated Program for the Master of Engineering Course in Welding Engineering Technology, KMUTNB Harmonize to International Welding Engineer, IIW Responding to the Need of Thailand 4.0/IR 4.0 -- 1 Introduction -- 2 Purpose or Goal -- 3 Approach -- 4 Analysis.

5 Comparative Analysis of Compatibility for Master of Engineering in Welding Engineering Technology (MWET) Harmonizes to the International Welding Engineer (IWE) -- 5.1 Overviews on the Missions of CIT/KMUTNB and WIT/IIW -- 5.2 Three-Stages Model of the Integrated Program -- 5.3 Implementation -- 5.4 Output/Outcome -- 6 Conclusion -- References -- Attitudes of Engineers Towards Ethics and Prospects for Education -- 1 Introduction -- 2 Methods -- 3 Results -- 4 Discussion -- 5 Conclusions -- References -- Inclusion of the Sustainable Development Goals in an Engineering - Biomimetics and Sustainability - Course Curricula -- 1 Introduction -- 1.1 Education for Sustainable Development -- 1.2 Biomimicry as a Framework for Sustainable Development -- 1.3 Justification of This Work -- 2 Methodology -- 2.1 Pedagogical Strategy -- 2.2 Assessment and Data Analysis -- 3 Results and Discussion -- 4 Conclusion -- References -- Learning Content Revisited: Basis for Creating a System of Educational (Pedagogical) Activities -- 1 Introduction -- 2 Background -- 3 Methodology and Results of the Pilot Study -- 3.1 Pilot Study with Publishers -- 3.2 Pilot Study of Teachers' Curriculum "Reading" Skills -- 4 Discussion -- 5 Conclusions -- References -- IGIP Prototype Curriculum in Lifelong Professional Pedagogical Development of Technical Teachers -- 1 Context -- 2 Goal and Approach -- 3 Actual Outcomes -- 3.1 The Model of Lifelong Pedagogical Professionalism Development of TPU -- 3.2 The Model of Lifelong Professional Education of Teaching Staff Under the International Project ENTER -- 3.3 The Model of Integrated Training of PhD Students for Pedagogical Activity in Skoltech -- 3.4 The Model of Engineering Pedagogical Continuing In-Service Education in TUT -- 4 Conclusions -- References.

Development of Social Activity of Engineers-Pedagogues as a Social Skill in Online Education -- 1 Problem Statement -- 2 Analysis of Recent Research and Publications -- 3 Statement of Basic Material and the Substantiation of the Obtained Results -- 4 Conclusions -- References -- Educational Role-Playing Games in the Normative Behavior Development of Future Engineer-Teachers -- 1 Problem Statement -- 2 Analysis of Recent Research and Publications -- 3 Statement of Basic Material and the Substantiation of the Obtained Results -- 4 Conclusions -- References -- Pedagogical Approach for BUILD2050 Pilot Training Project -- 1 Introduction -- 2 Project Features -- 3 Pedagogical Framework for BUILD2050 -- 3.1 Step 1 - Setting the Learning Objectives -- 3.2 Step 2 - Designing the Learning Structure -- 3.3 Step 3 - Setting the Learning Activities -- 3.4 Step 4 - Developing the Didactic Resources -- 3.5 Step 5 - Implementing and Evaluating the Pedagogical Framework -- 4 Results of the Pedagogical Framework Application -- 5 Conclusions -- References -- Enhancing Learning Activities Using Innovation Based Problem-Solving Process in Promoting Practical Skills of Electrical Technology -- 1 Introduction -- 2 Research Purpose -- 3 Learning and Teaching Theories -- 3.1 Problem-Solving Skill -- 3.2 Behavioral Theories -- 3.3 Educational Innovation -- 4 Development of Learning Activities and Innovative Media -- 4.1 Development of Innovation-

Based Problem-Solving Process -- 4.2 Development of Innovative Teaching Packages -- 4.3 Implementation in Innovation Based Problem-Solving Processes -- 5 Research Results -- 5.1 The Quality Evaluation of the Innovative Media Packages -- 5.2 The Evaluation of Solving Problem-Based Competencies -- 5.3 The Evaluation of Learning Achievement -- 6 Summary -- References.

Development of Laboratory-Based Learning and Teaching Activities of Communication Systems for 21st Century Innovative Learning Skills -- 1 Introduction -- 2 Research Purpose -- 3 Development of Laboratory-Based Learning -- 4 Development of Laboratory-Based Instructional Package -- 5 Implementation of Research Tools -- 6 Research Results -- 6.1 The quality of the Laboratory-Based Learning Model -- 6.2 The Evaluation of the Learning Achievement of Learners -- 6.3 The Satisfaction of the Learners -- 7 Summary -- References --

Development of a Simulation Tool for Electromagnetism Education -- 1 Introduction -- 2 Finite Element Method in ONELAB Environment -- 2.1 Boundary Conditions and Meshing -- 2.2 Governing Equations and Solvers -- 3 Simulations Developed -- 4 Mobile Application -- 5 Conclusions -- References --

Practicing the Engineering Fundamentals in a Project-Based Design and 3D Printing Course -- 1 Introduction -- 2 The Course -- 2.1 The Course Lectures -- 2.2 The Design Tasks -- 3 The Study -- 4 Findings -- 4.1 The Course Impact on Students' Outcomes -- 4.2 Students' Perceptions -- 5 Conclusion -- References --

Open Digital Badges and Micro-accreditation in the International Engineering Educator Certification Program (IEECP) -- 1 Introduction -- 2 Background -- 3 International Engineering Educator Certification Program (IEECP) in Latin America -- 3.1 Competency Based Approach Model of the IEECP -- 3.2 Competency Based Approach and LO Assessment in the IEECP LMS -- 3.3 IEECP Motivation and Decisions about OB and MA -- 4 Open Badges in Moodle -- 4.1 Open Badges v2.0 Standard, Open Badge Factory Integration -- 4.2 Learning Outcomes, Competencies and OB -- 4.3 IEECP Moodle Configuration to Support OB -- 5 IEECP Teaching and Learning Practices -- 6 IEECP Participants Opinion -- 7 Conclusions -- References.

Does Hedy, the Gradual Programming Language Help Computing Undergraduates to Learn Programming? -- 1 Introduction -- 2 Materials and Method -- 2.1 Addressing RQ1: Perspective of Hedy -- 2.2 Addressing RQ2: Understanding of Python -- 2.3 Addressing RQ3: Programming Performance -- 3 Results and Discussion -- 3.1 Perspective of Hedy -- 3.2 Understanding of Python -- 3.3 Programming Performance -- 4 Conclusion -- References --

Empowering Diverse Learners: Embracing Culturally Relevant Pedagogy (CRP) in Engineering, Higher Education, and K-12 Settings -- 1 Introduction -- 2 Culturally Relevant Pedagogy (CRP) in Engineering -- 2.1 Critical Consciousness -- 2.2 Transformative Practices -- 2.3 Retention -- 2.4 Social Justice -- 3 Culturally Relevant Pedagogy (CRP) in Higher Education -- 3.1 Promoting Inclusiveness -- 3.2 Math Readiness -- 3.3 Internationalization of Higher Education -- 4 Culturally Relevant Pedagogy (CRP) in K-12 -- 4.1 Connections with Course Contents -- 4.2 Academic Performance and Racial Views -- 4.3 Funds of Knowledge (FoK) -- 5 Conclusion -- References --

A Theory-Based Concept for Fostering Sustainability Competencies in Engineering Programs -- 1 Introduction -- 2 Methodology -- 3 Analysis of the EER-Landscape on the Topic of Sustainability Education in Engineering Studies -- 4 Theory-Based Teaching Concept for Sustainable Engineering Education -- 4.1 Teaching Concept for Sustainable Competences in Engineering -- 4.2 Implementation -- 4.3 Student's Feedback -- 5 Summary -- References --

Using Digital

Laboratories for the Development of Students' Engineering Thinking --
1 Introduction -- 2 Methods -- 3 Results -- 4 Conclusion --
References -- Interactive Algorithms: A Didactic Strategy for Non-
programmers -- 1 Introduction -- 2 Computing and Programming
Languages -- 3 Algorithms and Learning.
4 Interactive Algorithm Programming Methodology.
