Supporting Co-evolution of Tasks and Artifacts with Luna -- A Novel Strategy for Efficient Negotiation in Complex Environments -- Selfish Road Users – Case Studies on Rule Breaking Agents for Traffic Simulation -- Modelling Emotional Trajectories of Individuals in an Online Chat -- Using Time as a Strategic Element in Continuous Double Auctions -- Goal Delegation without Goals: BDI Agents in Harmony with OCMAS Principles -- A Multi-robot Coverage Approach Based on Stigmergic Communication -- Multi-Agent Systems Applied to the Field of Ornamental Plants -- An Argumentation-Based Approach to Cooperative Multi-source Epistemic Conflict Resolution -- The Importance of Being Accurate in Agent-Based Models – An Illustration with Agent Aging.

| Sommario/riassunto | This book constitutes the proceedings of the 10th German Conference on Multiagent System Technologies held in Trier Germany, in October 2012. The 7 revised full papers presented together with 6 short parers and one invited paper were carefully reviewed and selected from 39 submissions. The paper cover various research topics in intelligent agents and multi-agent-systems. In particular, the conference investigated technologies for truly open distributed systems covering a wide spectrum of approaches from self-organization and autonomous systems to agreement computing. |

Sommario/riassunto	These days, subcontractors in the construction industry are generally aware of their rights and obligations, and main contractors and clients' advisers need to keep abreast of developments in subcontract law. As the majority of work is carried out under JCT contracts, all parties need to understand the rights and obligations of the latest JCT 05 suite of subcontracts, against the background of the general principles of contract law.A companion to Peter Barnes' first book, The JCT 05 Standard Building Sub-Contract, this book deals with all the other JCT 05 subcontracts including:<br
