

1. Record Nr.	UNINA9910831041003321
Titolo	The total synthesis of natural products . Volume 11, Part B Bicyclic and tricyclic sesquiterpenes [[electronic resource] /] / Michael C. Pirrung, Andrew T. Morehead, Jr., and Bruce G. Young
Pubbl/distr/stampa	New York, : Wiley, 2000
ISBN	1-282-30538-7 9786612305382 0-470-12974-3 0-470-12963-8
Descrizione fisica	1 online resource (500 p.)
Collana	The total synthesis of natural products ; ; 11/B
Altri autori (Persone)	ApSimonJohn
Disciplina	547 /.2 547.70459
Soggetti	Terpenes Sesquiterpenes
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	THE TOTAL SYNTHESIS OF NATURAL PRODUCTS; CONTENTS; Acknowledgments; Introduction; Reagent Glossary; III. BICYCLIC SESQUITERPENES; A. Eudesmanes; 1. B-Eudesmol, a-Eudesmol, Intermediol, Neointermediol, Amiteol, Cycloeudesmol, Maaliol, a-Selinene, B-Selinene, Y-Selinene, Selinadiene, AE I , Vetiselinene; 2. B-Dictyopterol, Selin-4(15)-ene-1B,11-diol, Balanitol, Occidentalol, Isochamaecynone, Chamaecynone, Emmotin-G, Occidol; 3. Amitermes Defensive Substance, Isocelorbicol; 4. a-Cyperone, B-Cyperone, Carissone 5. Eudesma-4( 14),7(11)-diene-8-one, Arctiol, B-Costol, B-Costal, Isocostic Acid, 3-Oxoisocostic Acid, 1- Oxocostic Acid6. a-Costal, 7-Hydroxycostol, 7-Hydroxycostal; 7. 3-Oxaeudesmatrienoic Acid, 12,15-Dioxaselina-4,11- diene; 8. Junenol, Acolamone; 9. Atractylon, Lindestrene, Tubipofuran; 10. Glutinosone; 11. Dehydroasterolide, Dihydrocallitrisin, Isoalantolactone, Septuplinolide, Ivalin, Oxodiplophyllin, Yomogin; 12. Frullanolide, Tuberiferin, Deoxybrachylaenolide, Gazanolide, Arbusculin D, 3-Oxo-11-hydroxy-

eudesmadienolide, Magnolialide, Maritimin, Dihydrosantamarine, asantonin

B. Cadinanes 1. Calamenene, Hydroxycalamenenes, Methoxycalamenenes; 2. Mansonones, Perezinone; 3. 7,8-Dihydroxy-11,12-dehydrocalamenene, Heritol; 4. Lacinilene C; 5.  $\alpha$ -Cadinene,  $\gamma$ -Cadinene,  $\epsilon$ -Cadinene,  $\epsilon$ -Muurolene, B-Cadinene, G-Cadinene; 6. Zonarene, Dihydropernetic Acid B, Veticadinol, Torreyol, Isocalamenediol, Cubenol, Epicubenol; 7. 1,4-Epoxy-cadinane, Verbocidentafuran, Hibiscone, Arteannuin B; 8. Halipanicine, Sclerosporin, Sclerosporal, Khusilal; C. Drimanes; 1. Bicyclofarnesic Acid, Drimenol, Albicanyl Acetate, Albicanol, Farnesiferol A 2. Euryfuran, Valdiviolide, Confertifolin, Isodrimenin, Cinnamolide, Polygodial, Drimenin 3. Fragrolide, Cinnamodial, Warburganal, Isotadeonal, Muzigidial, Colorata-4(13),8-dienolide, 3B-Acetoxydrimenin, Pereniporin A, Pereniporin B; 4. Driman-8,11-diol, Drim-9(11)-en-8-ol, 7-Oxo-11-nordrimen-8-en-12-oic Acid, 1,1,5,6-Tetramethyltetralin; D. Eremophilanes; 1. Nootkatone, Valencene, Isovalencenic Acid, Isovalencenol, Eremoligenol, Eremophilene, Valerianol, Eremophilone, Dehydrofukinone, Aristolone, Isopetasol, Petasol, Petasitolone; 2. Phomenone, Eremofortin B, Sporogen-AO 1 3. Ligularenolide, Ligularone, Petasalbina, Eremophilanolide, Furanoeremophilone, Furanoeremophilan-14,6  $\alpha$ -olide E. Miscellaneous Hydronaphthalenes; 1. Acetyldehydrorishitinol, Cinalbicol, 4-Methoxyisocadalene, 4-Hydroxyisocadalene, 1-Hydroxyisocadal-4-one, 2-Methoxy-7-norcalamenene, Maturone, Platyphyllide; 2. Ambrox, Pallescensin A; 3. Furodysin, Furodysinin; 4. Lemnal-Sa-en-2-One, Kanshone A, Nardosinone; 5. Valerane, Valeranone, Cryptofauronol, Fauronyl Acetate; 6. Isoacanthodoral, Nanaioamol; 7. Thujopsene; F. Fused Ring Compounds: 6,3; 1. Sirenin, Sesquicarene, Isosesquicarene

G. Fused Ring Compounds: 6,5

### Sommario/riassunto

The past two decades have seen an explosion in research on the synthesis of sesquiterpenes, an important class of hydrocarbons commonly found in oils, resins, and balsams. Volume Eleven in The Total Synthesis of Natural Products series continues to review this dynamic area of chemistry. It features systematic, A-to-Z coverage of sesquiterpenes synthesized between 1979-1994—a sesquidecade. Focusing on bicyclic and tricyclic compounds in sesquiterpene synthesis, this authoritative work complements Volume Ten's coverage of acyclic and monocyclic sesquiterpenes. The authors comb through the
