Sommario/riassunto

A lively account of fluoridation and its discontents Since its first implementation in Grand Rapids, Michigan, in 1945, public drinking water fluoridation and its attendant conflicts, controversies, and conspiracy theories serve as an object lesson in American science, public health, and policymaking. In addition to the arguments on the issue still raging today, the tale of fluoridation and its discontents also resonates with such present concerns as genetically modified foods, global warming response, nuclear power, and environmental regulation. Offering the best current thinking o
