

1. Record Nr.	UNINA9910831161303321
Autore	Lalena John N.
Titolo	Principles of inorganic materials design / / John N. Lalena, David A. Cleary, Olivier B. M. Hardouin Duprac
Pubbl/distr/stampa	Hoboken, New Jersey : , : Wiley, , 2020
ISBN	1-5231-3730-4 1-119-48691-2 1-119-48676-9 1-119-48687-4
Edizione	[Third edition.]
Descrizione fisica	1 online resource (723 pages)
Disciplina	546
Soggetti	Chemistry, Inorganic - Materials
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Sommario/riassunto	"With its proven concept, this textbook introduces topics relevant to the design of new materials. It covers a wide range of topics in the area of inorganic materials structure/property relations and materials behavior across length scales. New to this third edition are chapters specifically on computational materials science, compound semiconductors, intermetallic compounds, and covalent compounds. Also, there are expanded discussions on several topics, including microstructural considerations, transport properties, magnetic and dielectric properties, and nanomaterials. This textbook therefore provides a state-of-the-art introduction to inorganic materials design for advanced students of materials science, chemistry and engineering"--
