Soggetti	Galaxies Galactic center Congresses
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references at the end of each chapters.
Nota di contenuto	Galactic Center Workshop 2002; Contents; Chapter 1: Large Scale Structures: Surveys and Interactions; Chapter 2: Molecular Clouds and Magnetic Fields; Chapter 3: Sagittarius A and its Environs; Chapter 4: Stars and Star Formation; Chapter 5: Sgr A* I: New Observational Results; Chapter 6: Sgr A* 11: Theoretical Models; Chapter 7: The Central Parsec; Chapter 8: Morphology and Dynamics of the Central 10 Parsecs
Sommario/riassunto	Our knowledge of the environment of the nucleus of our galaxy has been greatly enhanced, by more extensive and sensitive observations at radio and infrared wavelengths, the advent of high resolution x-ray imaging and spectroscopy, and considerable theoretical activity to understand the nucleus and its components, and their activity. The Galactic Center Workshop 2002 was organized to review recent research on the galactic center, including the latest state-of-the-art observations and important theoretical developments. The workshop covered phenomena on scales ranging from the central several
