

1. Record Nr.	UNINA9910831182803321
Autore	Shindo D (Daisuke), <1953->
Titolo	Material characterization using electron holography // Daisuke Shindo, Takeshi Tomita
Pubbl/distr/stampa	Weinheim, Germany : , : Wiley-VCH, , [2023] ©2023
ISBN	9783527829712 3-527-82971-7 3-527-82969-5 9783527829705 3-527-82970-9
Descrizione fisica	1 online resource (242 pages) : illustrations
Disciplina	502.825
Soggetti	Electron holography Materials - Electric properties Transmission electron microscopy
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Cover -- Title Page -- Copyright -- Contents -- Preface -- List of Specimens -- Part I Introduction -- Chapter 1 Importance of Electromagnetic Field and Its Visualization -- Chapter 2 Maxwell's Equations and Special Relativity -- 2.1 Maxwell's Equations and Electromagnetic Potentials -- 2.2 Maxwell's Equations Formulated Using Special Relativity -- References -- Chapter 3 Basis of Transmission Electron Microscopy -- Part II Principles and Practice -- Chapter 4 Principles of Electron Holography -- 4.1 Types of Electron Holography -- 4.2 Outline of Electron Holography -- 4.3 Comparison of Phase Shifts Due to Scalar and Vector Potentials -- 4.3.1 Phase Shift Due to Scalar Potential -- 4.3.2 Phase Shift Due to Vector Potential -- 4.3.3 Effect of Thickness Change on Phase Shifts Due to Scalar and Vector Potentials -- 4.3.4 Electric Information -- 4.4 Analysis of Reconstructed Phase Images by Computer Simulation -- References -- Chapter 5 Microscope Constitution and Hologram Formation -- 5.1 Basic Constitution of Transmission Electron Microscope -- 5.1.1

Electron Gun System -- 5.1.2 Illumination System -- 5.1.3 Imaging System -- 5.1.3.1 Focal Length -- 5.1.3.2 Spherical Aberration Coefficient -- 5.1.3.3 Chromatic Aberration Coefficient -- 5.1.3.4 Minimum Step of Defocus -- 5.1.4 Observation System -- 5.1.4.1 Television Camera -- 5.1.4.2 SlowScan ChargeCoupled Device Camera -- 5.1.5 Operation of Transmission Electron Microscope -- 5.1.5.1 Adjustment of Electron Gun -- 5.1.5.2 Alignment and Astigmatism Correction of Condenser Lenses -- 5.1.5.3 Alignment of Voltage Center and Correction of Objective Lens Astigmatism -- 5.1.5.4 Correction of Intermediate Lens Astigmatism -- 5.1.5.5 Alignment of Projector Lens -- 5.1.5.6 Adjustment of Objective Lens Focus -- 5.2 Biprism System -- 5.3 Coherence Lengths -- 5.4 Formation of Interference Fringes. 5.4.1 GeometricalPath Interpretation with Two Virtual Sources -- 5.4.2 WaveOptical Treatment -- 5.4.2.1 Wave Function at Wire Plane -- 5.4.2.2 Green's Integral Theorem -- 5.4.2.3 Explicit Form of Green's Function -- 5.4.2.4 Intensity Distribution of Interference Fringes -- 5.4.2.5 Stationary Points and Interference Region -- 5.4.2.6 Spacing of Interference Fringes -- 5.5 Simulation of Interference Fringes -- References -- Chapter 6 Related Techniques and Specialized Instrumentation -- 6.1 SplitIllumination Electron Holography -- 6.2 DarkField Electron Holographic Interferometry -- 6.3 Lorentz Microscopy -- 6.3.1 Fresnel Mode (Defocusing Mode) -- 6.3.2 Foucault Mode (InFocus Mode) -- 6.3.3 Lorentz Microscopy Using Scanning Transmission Electron Microscope -- 6.3.4 Phase Reconstruction Using TransportofIntensity Equation -- 6.4 Magnetically Shielded Lens and HighVoltage Electron Microscope -- 6.5 AberrationCorrected Lens System -- 6.6 Multifunctional Specimen Holders with Piezodriving Probes -- 6.7 Specimen Preparation Techniques -- 6.8 HighResolution and Analytical Electron Microscopy -- 6.8.1 Conventional Microscopy and HighResolution Electron Microscopy -- 6.8.2 HighAngle Annular DarkField Method -- 6.8.3 Analytical Electron Microscopy -- References -- Part III Application -- Chapter 7 Electric Field Analysis -- 7.1 Measurement of Inner Potential -- 7.1.1 DiamondLike Carbon -- 7.1.2 SiO₂ Particles -- 7.1.3 p-n Junctions and LowDimensional Materials -- 7.2 Electric Field Analysis of Precipitates in Multilayer Ceramic Capacitor -- 7.3 Analysis of Spontaneous Polarization in Oxide Heterojunctions -- 7.4 Evaluation of Electric Charge with Laser Irradiation -- 7.5 Analysis of Conductivity with Microstructure Changes -- 7.6 Detection of Electric Field Variation Around Field Emitter -- References -- Chapter 8 Magnetic Field Analysis. 8.1 Quantitative Analysis of Magnetic Flux Distribution of Nanoparticles -- 8.2 Observation of Magnetization Processes -- 8.2.1 Soft Magnetic Materials -- 8.2.2 Hard Magnetic Materials -- 8.2.3 Magnetic Recording Materials -- 8.2.4 Ferromagnetic ShapeMemory Materials -- 8.3 Observation of Magnetic Structure Change with Temperature -- 8.4 Analysis of ThreeDimensional Magnetic Structures -- References -- Part IV Visualization of Collective Motions of Electrons and Their Interpretation -- Chapter 9 Charging Effects and Secondary Electron Distribution of Biological Specimens -- 9.1 Visualization of Stationary Electron Orbits -- 9.1.1 Stationary Electron Orbits Observed Around Microfibrils -- 9.1.2 Simulation of Electron Orbits Around Microfibril -- 9.1.3 Interpretation of Reconstructed Amplitude Image -- 9.1.4 Simulation of Visibility of Interference Fringes for Electron Motion -- 9.1.5 Change in Electron Orbits Due to Insertion of Electrode -- 9.2 Visualization of Accumulative and Collective Motions of Electrons -- References -- Chapter 10 Collective Motions of Electrons Around Various Charged Insulators -- 10.1 Accumulation of Electrons on Cleaved Surfaces of BaTiO₃ -- 10.2 Dependency of Electron

Distribution on Surface Condition of Epoxy Resin and Kidney -- 10.3
Electron Distribution Between Epoxy Resin and Kidney -- 10.4 Control
of Electron Distribution Around Cellulose Nanofibers by Applying
External Electric Field -- References -- Chapter 11 Extension of
Analysis of Collective Motions of Electrons -- 11.1 Electron Spin
Polarization -- 11.2 Accumulation of Electrons on Bulk Insulator
Surface -- References -- Chapter 12 Theoretical Consideration on
Visualizing Collective Motions of Electrons -- 12.1 De Broglie's Matter
Wave and Wave Function -- 12.2 DisturbanceFree Observation -- 12.3
Electron Interference and General Relativity.
12.3.1 Einstein's Field Equations Based on General Relativity -- 12.3.2
Infeld and Schild's Approximate Solution to Einstein's Field Equations
-- 12.4 Spinning Linear Wave Model -- 12.5 Electron Interference
Formulated with Spinning Linear Wave -- 12.5.1 Interpretation of
Diffraction Intensity -- 12.5.2 Interpretation of Interference Fringes --
12.5.3 Simulation of Interference Fringes -- 12.6 Interpretation of
Wave-Particle Dualism -- References -- A Physical Constants,
Conversion Factors, and Electron Wavelength -- Index -- EULA.
