Effects of Government Restrictions on Land Ownership: The
Saskatchewan Case; Index

Sommario/riassunto

Of immeasurable value to lenders, agricultural economists, and a host of agribusinesses this unique volume brings together leading farmland authorities in the United States and Canada to examine the economic determinants of land value and the consequences of change in land values. As the most basic factor of production in the agricultural enterprise, farmland dominates the agricultural balance sheet, accounting for an average of 70% of all agricultural assets. The authors of this timely book provide expert analysis and review of this subject.
