

1. Record Nr.	UNINA9910831500603321
Autore	Reddy Krishna R
Titolo	Recent Advances in Civil Engineering : Select Proceedings of ICC-IDEA 2023
Pubbl/distr/stampa	Singapore : , : Springer Singapore Pte. Limited, , 2024 ©2024
ISBN	981-9962-29-3
Edizione	[1st ed.]
Descrizione fisica	1 online resource (683 pages)
Collana	Lecture Notes in Civil Engineering Series ; ; v.398
Altri autori (Persone)	RavichandranP. T AyothiramanR JosephAnil
Disciplina	624
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Preface -- Contents -- Editors and Contributors -- Geotechnical Engineering -- Enhance the Engineering Properties of Low Load Carrying Capacity of Expansive Soil by Using Alccofine-1203 and Phosphogypsum -- 1 Introduction -- 2 Materials and Methodology -- 2.1 Black Cotton Soil -- 2.2 Alccofine -- 2.3 Phosphogypsum (PG) -- 2.4 Testing Methodology -- 3 Result and Discussion -- 3.1 Atterberg Limits -- 3.2 Free Swell Index (FSI) -- 3.3 Free Swell Ratio (FSR) -- 3.4 Cation-Exchange Capacity -- 3.5 Unconfined Compressive Strength (UCS) -- 4 Mineralogical and Microstructural Analysis -- 4.1 SEM Analysis -- 5 Conclusion -- References -- Early Strength of an Expansive Soil Stabilized Using a Blend of Hydrated Lime, Unrefined Brown Sugar and Ground Gallnut Dust Under Varying Curing Conditions -- 1 Introduction -- 2 Materials and Methods -- 3 Results and Discussion -- 3.1 Optimization of UBS and GGD -- 3.2 Influence of Curing Condition -- 3.3 Wet-Dry Response -- 4 Conclusions and Recommendations -- References -- A Study on the Strength Characteristics of Expansive Soil Blended with Rice Husk Ash -- 1 Introduction -- 2 Materials Used -- 2.1 Soil -- 2.2 Rice Husk Ash -- 3 Sample Preparation and Tests on Soil -- 4 Results and Discussions -- 4.1 Compaction Characteristics Behavior of Soil -- 4.2 Unconfined Compressive Strength -- 4.3 California Bearing Ratio -- 4.4 Free Swell

Index -- 5 Conclusions -- References -- Study on Performance of Expansive Soil Using Agro Waste as a Sustainable Stabilizer -- 1 Introduction -- 2 Materials and Methodology -- 2.1 Soil -- 2.2 Wheat Husk Ash (WHA) -- 3 Sample Preparation and Tests -- 4 Results and Discussion -- 4.1 Effect of Additive in Strength Characteristics of the Soil -- 4.2 Effect of Additive in Swell Characteristics of the Soil -- 4.3 Microstructural Analysis of the Soil -- 5 Conclusion -- References.

Artificial Intelligence in the Construction Industry: A Status Update, Prospects, and Potential Application and Challenges -- 1 Introduction -- 1.1 The Conference that Started the Reign -- 1.2 Aim of the Review -- 2 Previous Systematic Literature Review in Civil Engineering -- 3 Research Methodology -- 3.1 Construction of Literature Review -- 4 Research and Analysis -- 4.1 RQ1 Elucidate AI? -- 4.2 RQ2 How Many Scholarly Works on AI from the AEC Have Been Published? -- 4.3 RQ3 What is the Application of AI in the Building Business? -- 4.4 RQ4 What is the Future of AI in the Building Sectors? -- 4.5 RQ5 What Are the Challenges Overlooked in Applying AI in Building Technology? -- 5 Conclusion -- References -- Prediction of Diaphragm Wall Deflection by Using Different Models for Deep Excavation in Sands -- 1 Introduction -- 2 Case Study Overview -- 3 Numerical Modelling -- 3.1 Mohr-Coulomb Model (MC Model) -- 3.2 Hardening Soil Model (HS Model) -- 3.3 Hardening Soil Small Strain Model (HSS Model) -- 4 Results -- 4.1 MC Model -- 4.2 HS Model -- 4.3 HSS Model -- 4.4 Comparing of Results from Different Soil Models -- 4.5 Numerical Analysis in 3D -- 5 Conclusion -- References -- Geomatics, Geosciences, Remote Sensing, Geographical Information Systems -- A Comparative Study on Various Water Index Methods Through Satellite Image Processing for Pre- and Post-flood Monitoring of 2021-A Case Study of Chengalpattu Taluk, India -- 1 Introduction -- 2 Study Area -- 3 Data Collection -- 4 Methodology -- 4.1 Data -- 4.2 Image Preprocessing -- 4.3 Index Analysis -- 4.4 Normalized Difference Water Index (NDWI) -- 4.5 Modified Normalized Difference Water Index (MNDWI) -- 4.6 Water Ratio Index (WRI) -- 5 Accuracy Assessment -- 6 Conclusion -- References -- Metro Route Selection Using Quantum GIS -- 1 Introduction -- 2 Methodology -- 3 QGIS Modelling Process. 3.1 Creating Shape File -- 3.2 Creating Road Map -- 3.3 Geomorphology Map -- 3.4 Soil Map -- 3.5 Slope Map -- 4 Results and Discussion -- 5 Conclusions -- References -- Groundwater Potential Zone Identification Through Remote Sensing GIS Technology in Part of Dharmapuri District, Tamil Nadu -- 1 Introduction -- 1.1 Climate and Rainfall -- 1.2 Population -- 1.3 Communication -- 1.4 Vegetation -- 1.5 Crops -- 1.6 Hydrogeology -- 2 Materials and Methods -- 2.1 Base Map Generation -- 2.2 Remote Sensing -- 3 Study Area Details and Groundwater Possibility -- 3.1 Study Area Description -- 3.2 Soil -- 3.3 Geology -- 3.4 Drainage Patterns and Drainage Density -- 3.5 Land Use/Land Cover -- 3.6 Slope -- 3.7 GIS Analysis -- 3.8 Groundwater Possible Studies -- 4 Conclusion -- References -- Watershed Monitoring Application for Sub-watersheds of Lower Palar River Reach Using Remote Sensing Data and Google Earth Engine Platform -- 1 Introduction -- 2 Study Area -- 3 Material and Methods -- 3.1 Data Used -- 3.2 Watershed Delineation -- 3.3 Rainfall Estimation -- 3.4 Land Use Land Cover Classification -- 3.5 Surface Water Mapping -- 3.6 Flood Mapping -- 3.7 Web-Based Application -- 4 Results and Discussion -- 5 Conclusion -- References -- Using Decision Risk and Decision Accuracy Metrics for Decision Making for Remote Sensing and GIS Applications -- 1 Introduction -- 1.1 Confusion Matrix -- 2 Research Background -- 3 Decision Metrics

-- 3.1 Absolute Accuracy -- 3.2 Decision Risk -- 3.3 Decision Accuracy
-- 4 Decision Metrics Interpretation -- 4.1 Decision Making
for Classifier or Predictor or Estimator -- 4.2 Decision Making
for Classification or Prediction or Estimation -- 5 Research
Methodology -- 6 Result and Discussion -- 6.1 Classification -- 6.2
Classifier -- 7 Conclusion -- Appendix: Reference Confusion Matrix --
Confusion Matrix (Count-Based Method) [10].
References -- Potential Hafir Dam Site Selection Using GIS and Remote
Sensing Techniques in Gabiley District, Somaliland -- 1 Introduction --
2 Study Area and Methodology -- 2.1 Research Area -- 2.2 Dam Site
Selection Criteria -- 2.3 Steps of Site Selection -- 3 Results
and Discussions -- 4 Conclusion -- References -- Surveying
and Geospatial Engineering -- Spatial Analysis of Physical
Characteristics of Slums in Tiruchirappalli City -- 1 Introduction -- 1.1
Role of GIS and Remote Sensing in Slum Mapping -- 2 Study Area -- 3
Methodology -- 3.1 Mapping and Assessment of Slum Using GIS -- 3.2
Mapping Through ArcMap -- 4 Results and Discussions -- 4.1 Results
Obtained from Mapping Data -- 4.2 Identified Slums and Recognized
Slums -- 4.3 Housing Conditions, Street Lights, and Street Light
Availability -- 4.4 Slum Analysis -- 5 Conclusions -- References --
Assessment on the Impact of Land Use, Land Cover in the Upstream
of the Adyar River Basin, Tamil Nadu, India -- 1 Introduction -- 2 Study
Area: Upstream of the Adyar River Basin -- 3 Methods and Data
Acquisitions -- 4 Result and Discussion -- 4.1 Land Use Land Cover
Classification (LULC) -- 4.2 Accuracy Assessment -- 4.3 Upstream
of the Adyar basin's LULC Change Deduction -- 5 Conclusion --
References -- Spatial Analysis of Soil Organic Carbon in the Thuckalay
Block of the Kanyakumari District -- 1 Introduction -- 2 Materials
and Methods -- 2.1 Study Area Description -- 2.2 Data -- 2.3
Methodology -- 3 Indices -- 3.1 Normalized Difference Vegetation
Index (NDVI) -- 3.2 Bare Soil Index (BSI) -- 3.3 Soil Adjusted Vegetation
Index (SAVI) -- 4 Results -- 4.1 Relationship Between SOC, BSI,
and SAVI -- 5 Discussion -- 6 Conclusion -- References -- Analytical
Hierarchy Process for Land Suitability Analysis of Urban Growth
in Latakia, Syria -- 1 Introduction -- 2 Materials and Methods -- 2.1
Study Area.
2.2 Multicriteria Evaluation (MCE) Method and Thematic Maps
Preparation -- 2.3 Defining Criteria Weights Using AHP -- 3 Results
and Discussion -- 3.1 Land Slope -- 3.2 Land Elevation -- 3.3 Land
Use (LU) -- 3.4 Road Proximity -- 3.5 Water Bodies -- 3.6 Coastal Line
-- 3.7 Existing Settlements -- 4 Conclusion -- References --
Geospatial Analysis of Urban Sprawl Using Landsat Data in Kannur,
Kerala -- 1 Introduction -- 2 Study Area -- 3 Materials
and Methodology -- 3.1 Land Use/Land Cover Classifications -- 3.2
Accuracy Assessment -- 3.3 Change Detection -- 3.4 Built-up Area
Map -- 4 Results and Discussion -- 4.1 Land Use and Land Cover Map
-- 4.2 Accuracy Assessment -- 4.3 Change Detection in Built-up Area
-- 5 Conclusion -- References -- Estimation and Monitoring
on Fraction of Absorbed Photosynthetically Active Radiation (FPAR)
Changes in Sathyamangalam Reserve Forest -- 1 Introduction -- 2
Normalized Difference Vegetation Index -- 3 Significance of FPAR -- 4
Study Area -- 5 Data Source -- 6 Methodology -- 7 Result
and Discussion -- 8 Result and Discussion -- References --
Environmental Engineering -- Microplastics and the Environment:
A Review -- 1 Introduction -- 2 Literature Survey -- 3 Sources
of Microplastics -- 4 Distribution and Accumulation of Microplastics --
5 Fate of Microplastics -- 6 Hazard of Microplastics -- 7 Conclusions
-- References -- Microplastic Pollution Investigation for Chennai Coast

-- 1 Introduction -- 1.1 Microplastic Definition -- 1.2 Primary Microplastics -- 1.3 Secondary Microplastics -- 1.4 Sources of Microplastics -- 1.5 Potential Effects on the Environment -- 1.6 Study Area -- 1.7 Necessity for the Project -- 1.8 Objective of the Project -- 2 Methodology for Water Samples -- 2.1 General -- 2.2 Sampling -- 3 Methodology for Beach Sediments -- 3.1 General -- 4 Conclusion -- References.

Treatment of Wastewater with Phytoremediation Using Water Hyacinth-
A Review.
